SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K

☒ ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2025

☐ TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File No. 001-31332

LIQUIDMETAL TECHNOLOGIES, INC.

(Exact name of Registrant as specified in its charter)

Delaware

(State or other jurisdiction of incorporation or organization)

33-0264467

(I.R.S. Employer Identification No.)

20321 Valencia Circle

Lake Forest, CA 92630

(Address of principal executive offices, zip code)

Registrant's telephone number, including area code: **(949) 635-2100**

Securities registered pursuant to Section 12(b) of the Act: None

Securities registered pursuant to Section 12(g) of the Act:

Title of each class	Trading Symbol(s)	Name of each exchange on which registered
Common stock, \$0.001 par value per share	LQMT	OTCQB

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes ☐ No ☒

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act. Yes ☐ No ☒

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes ☒ No ☐

Indicate by check mark whether the registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit such files). Yes ☒ No ☐

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act:

Large accelerated filer ☐ Accelerated filer ☐ Non-accelerated filer ☒ Smaller reporting company ☒
Emerging growth company ☐

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act. ☐

Indicate by check mark whether the registrant has filed a report on and attestation to its management's assessment of the effectiveness of its internal control over financial reporting under Section 404(b) of the Sarbanes-Oxley Act (15 U.S.C. 7262(b)) by the registered public accounting firm that prepared or issued its audit report. Yes ☐ No ☒

If securities are registered pursuant to Section 12(b) of the Act, indicate by check mark whether the financial statements of the registrant included in the filing reflect the correction of an error to previously issued financial statements. ☐

Indicate by check mark whether any of those error corrections are restatements that required a recovery analysis of incentive-based compensation received by any of the registrant's executive officers during the relevant recovery period pursuant to §240.10D-1(b). ☐

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Act). Yes ☐ No ☒

The aggregate market value of the registrant's common stock held by non-affiliates of the registrant as of June 30, 2025, was approximately \$82,762,624. For purposes of this calculation only, (i) shares of common stock are deemed to have a market value of \$0.12 per share, the closing price of the common stock as reported on the "OTCQB Venture Marketplace" on June 30, 2025, and (ii) each of the executive officers, directors and persons holding more than 10% of the outstanding common stock as of June 30, 2025, is deemed to be an affiliate.

The number of shares of common stock outstanding as of March 12, 2026 was 917,285,149.

PART I

Forward-Looking Statements

This Annual Report on Form 10-K of Liquidmetal Technologies, Inc. contains “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended (the “Securities Act”), and Section 21E of the Exchange Act. These statements may state our management’s plans, future events, objectives, current expectations, estimates, forecasts, assumptions or projections about the company and its business. Any statement in this report that is not a statement of historical fact is a forward-looking statement, and in some cases, words such as “believes,” “estimates,” “projects,” “expects,” “intends,” “may,” “anticipate,” “plans,” “seeks,” and similar expressions identify forward-looking statements. Forward-looking statements involve risks and uncertainties that could cause actual outcomes and results to differ materially from the anticipated outcomes or results. These statements are not guarantees of future performance, and undue reliance should not be placed on these statements. It is important to note that our actual results could differ materially from what is expressed in our forward-looking statements due to the risk factors described in the section of this report entitled “Risk Factors” (Item 1A of this report) as well as the following risks and uncertainties:

- Our ability to fund our operations in the long-term through financing transactions on terms acceptable to us, or at all;
- Our history of operating losses and the uncertainty surrounding our ability to achieve or sustain profitability;
- Our limited history of developing and selling products made from our bulk amorphous alloys;
- Challenges associated with having products manufactured from our alloys and the use of third parties for manufacturing;
- Our limited history of licensing our technology to third parties;
- Lengthy customer adoption cycles and unpredictable customer adoption practices;
- Our ability to identify, develop, and commercialize new product applications for our technology;
- Competition from current suppliers of incumbent materials or producers of competing products;
- Our ability to identify, consummate, and/or integrate strategic partnerships;
- The potential for manufacturing problems or delays; and
- Potential difficulties associated with protecting or expanding our intellectual property position.

We undertake no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

Item 1. Business

In this Annual Report on Form 10-K, unless the context indicates otherwise, references to “the Company”, “Liquidmetal Technologies”, “our Company”, “we”, “us”, and similar references refer to Liquidmetal Technologies, Inc. and its subsidiaries.

Overview

We are a materials technology and manufacturing company focused on the development and commercialization of products made from proprietary amorphous alloys and/or utilizing proprietary amorphous alloy manufacturing technologies. In addition to developing our own manufacturing facility through our subsidiary in China, we work with third-party manufacturing and commercial partners to develop and commercial products made from our proprietary amorphous alloys.

Amorphous alloys are, in general, unique materials that are distinguished by their ability to retain a random atomic structure when they solidify, in contrast to the crystalline atomic structure that forms in other metals and alloys when they solidify. Liquidmetal alloys are proprietary amorphous alloys that possess a combination of performance, processing, and potential cost advantages that we believe will make them preferable to other materials in a variety of applications. The amorphous atomic structure of bulk alloys enables them to overcome certain performance limitations caused by inherent weaknesses in crystalline atomic structures, thus facilitating performance and processing characteristics superior in many ways to those of their crystalline counterparts. We believe the alloys and the molding technologies we employ can result in components for many applications that exhibit exceptional dimensional control and repeatability that rivals precision machining, excellent corrosion resistance, brilliant surface finish, high strength, high hardness, high elastic limit, alloys that are non-magnetic, and the ability to form complex shapes common to the injection molding of plastics. All of these characteristics are achievable from the molding process, so design engineers often do not have to select specific alloys to achieve one or more of the characteristics as is the case with crystalline materials. We believe these advantages could result in Liquidmetal alloys supplanting high-performance alloys, such as titanium and stainless steel, and other incumbent materials in a wide variety of applications. Moreover, we believe these advantages could enable the introduction of entirely new products and applications that are not possible or commercially viable with other materials.

Our bulk amorphous alloy technology is a relatively new technology as compared to many other material technologies, such as plastics and widely-used high-performance crystalline alloys. Historically, the successful commercialization of a new material technology has required the persistent improvement and refining of the technology over a sometimes lengthy period of time. Accordingly, we believe that our Company’s future success will be dependent on our ability to continue expanding and improving our technology platform by, among other things, constantly refining and improving our processes, optimizing our existing amorphous alloy compositions for various applications, and developing and improving new bulk amorphous alloy compositions.

General Corporate Information

We were originally incorporated in California in 1987, and we reincorporated in Delaware in May 2003. Our principal executive office is located at 20321 Valencia Circle, Lake Forest, California 92630. Our telephone number at that address is (949) 635-2100. Our Internet website address is www.liquidmetal.com and all of our filings with the Securities and Exchange Commission (“SEC”) are available free of charge on our website.

Our Technology

The performance, processing, and potential cost advantages of Liquidmetal alloys are a function of their unique atomic structure and their proprietary material composition.

Unique Atomic Structure

The atomic structure of Liquidmetal alloys is the fundamental feature that differentiates them from other alloys and metals. In the molten state, the atomic particles of all alloys and metals have an amorphous atomic structure, which means that the atomic particles appear in a completely random structure with no discernible patterns. However, when non-amorphous alloys and metals are cooled to a solid state, their atoms bond together in a repeating pattern of regular and predictable shapes or crystalline grains. This process is analogous to the way ice forms when water freezes and crystallizes. In non-amorphous metals and alloys, the individual crystalline grains contain naturally occurring structural defects that limit the potential strength and performance characteristics of the material. These defects, known as dislocations, consist of discontinuities or inconsistencies in the patterned atomic structure of each grain. Unlike other alloys and metals, bulk Liquidmetal alloys can retain their amorphous atomic structure throughout the solidification process and therefore do not develop crystalline grains and the associated dislocations. Consequently, bulk Liquidmetal alloys exhibit superior strength and other superior performance characteristics compared to their crystalline counterparts.

In 1993, researchers at the California Institute of Technology (“Caltech”) developed the first commercially viable amorphous alloy in a bulk form. We obtained the exclusive right to commercialize the bulk amorphous alloy through a license agreement with Caltech and have developed the technology to enable the commercialization of bulk amorphous alloys.

Proprietary Material Composition

The constituent elements and percentage composition of Liquidmetal alloys are critical to their ability to solidify into an amorphous atomic structure. The raw materials that we use in Liquidmetal alloys are readily available and can be purchased from multiple suppliers.

Advantages of Liquidmetal Alloys

Liquidmetal alloys possess a unique combination of performance, processing, and potential cost advantages that we believe makes them superior in many ways to other commercially available materials for a variety of existing and potential future product applications. The unique combined performance and processing features result in precise dimensional control and repeatability, surface finish, strength, hardness, elasticity, and corrosion resistance are uncommon in crystalline material alternatives. Additionally, the ability to leverage various molding processes and related tooling technologies provides the ability to deliver a broad range of material characteristics in a complex shaped component.

Performance Advantages

Our bulk Liquidmetal alloys provide several distinct performance advantages over other materials, and we believe that these advantages make the alloys desirable in applications that require high precision and repeatability, high yield strength, strength-to-weight ratio, elasticity, corrosion resistance and hardness.

Processing Advantages

The processing of a material generally refers to how a material is shaped, formed, or combined with other materials to create a finished product. Bulk Liquidmetal alloys possess processing characteristics that we believe make them preferable to other materials in a wide variety of applications. In particular, our alloys are amenable to processing options that are similar in many respects to those associated with plastics. Additionally, unlike most metals and alloys, our bulk Liquidmetal alloys are capable of being thermoplastically molded in bulk form. Thermoplastic molding consists of heating a solid piece of material until it is transformed into a moldable state, although at temperatures much lower than the melting temperature, and then introducing it into a mold to form near-to-net shaped products. Accordingly, thermoplastic molding can be beneficial and economical for net-shape fabrication of high-strength products. Liquidmetal alloys also have superior net-shape casting capabilities as compared to high-strength crystalline metals and alloys. “Net-shape casting” is a type of casting that permits the creation of near-to-net shaped products that reduce costly post-cast processing or machining.

Cost Advantages

Liquidmetal alloys have the potential to provide cost advantages over other high-strength metals and alloys in certain applications. Because bulk Liquidmetal alloys have processing characteristics similar in some respects to plastics, which lend themselves to near-to-net shape molding, Liquidmetal alloys can in many cases be shaped efficiently into intricate, engineered products. This capability can eliminate or reduce certain post-molding steps, such as machining and re-forming, and therefore has the potential to significantly reduce processing costs associated with making parts in high volume.

Our Strategy

The key elements of our strategy include:

- *Focusing Our Marketing Activities on Select Products with Optimized Gross-Margins.* We have focused and continue to focus our marketing activities on select products with optimized gross margins for the long term. This strategy is designed to align our product development initiatives with our processes and cost structure, and to reduce our exposure to more commodity-type product applications that are prone to unpredictable demand and fluctuating pricing. Our focus is primarily on products that possess design features that take advantage of our physical properties and manufacturing advantages of our technology and that command a price commensurate with the performance advantages of our alloys. In addition, we will continue to engage in prototype manufacturing for products that will ultimately be licensed to or manufactured by third-parties.
- *Pursuing Strategic Partnerships in Order to More Rapidly Develop and Commercialize Products.* We have and continue to actively pursue and support strategic partnerships that will enable us to leverage the resources, strength, and technologies of other companies in order to more rapidly develop and commercialize products. These partnerships may include licensing transactions in which we license full commercial rights to our technology in a specific application area, or they may include transactions of a more limited scope in which, for example, we outsource manufacturing activities or grant limited licensing rights. We believe that utilizing such a partnering strategy will enable us to reduce our working capital burden, better fund product development efforts, better understand customer adoption practices, leverage the technical and financial resources of our partners, and more effectively handle product design and process challenges.
- *Advancing the Liquidmetal® Brand.* We believe that building our corporate brand will foster continued adoption of our technology. Our goal is to position Liquidmetal alloys as a superior substitute for materials currently used in a variety of products across a range of industries. Furthermore, we seek to establish Liquidmetal alloys as an enabling technology that will facilitate the creation of a broad range of commercially viable new products. To enhance industry awareness of our company and increase demand for Liquidmetal alloys, we are engaged in various brand development strategies that could include collaborative advertising and promotional campaigns with select customers, industry conference and trade show appearances, public relations, and other means.

Applications for Liquidmetal Alloys

There is a very broad number of markets where Liquidmetal alloys have application opportunities. Some of the more prominent markets include: humanoid robots, medical/ dental, automotive, non-consumer electronics, and sporting equipment. We believe that these areas are consistent with our strategy in terms of market size, building brand recognition, and providing an opportunity to develop and refine our processing capabilities. Although we believe that strategic partnership transactions could also create valuable opportunities beyond the parameters of these target markets, we anticipate continuing to pursue these markets both internally and in conjunction with partners.

Humanoid Robots

We are engaged in product development efforts relating to various humanoid robot components that could be made from bulk Liquidmetal alloys. We believe that the unique properties of bulk Liquidmetal alloys provide the combination of long-lasting surface finish, corrosion resistance, strength, and precision required by most robotic applications. The potential value offered by our alloys is higher performance in some cases and cost reduction in others, the latter stemming from the ability of Liquidmetal alloys to be net shape molded into components, thus reducing costs of secondary processing common with existing processes.

Medical Devices

We are engaged in product development efforts relating to various medical devices that could be made from bulk Liquidmetal alloys. We believe that the unique properties of bulk Liquidmetal alloys provide a combination of performance and cost benefits that could make them a desirable replacement for incumbent materials, such as machined stainless steel and titanium, or components made from other more traditional metalworking technologies currently used in various medical device applications. Our ongoing emphasis has been on minimally invasive surgical instrument applications for Liquidmetal alloys. These include, but are not limited to, specialized blades, clamps, tissue suturing components, tissue manipulation devices and orthopedic instruments utilized for implant surgery procedures, dental devices, and general surgery devices. The potential value offered by our alloys is higher performance in some cases and cost reduction in others, the latter stemming from the ability of Liquidmetal alloys to be net shape molded into components, thus reducing costs of secondary processing common with other metalworking processes. The status of most components in the prototyping phase is subject to non-disclosure agreements with our customers.

Automotive Components

We are engaged in product development efforts relating to various automotive components that could be made from bulk Liquidmetal alloys. We believe that the unique properties of bulk Liquidmetal alloys provide the combination of long-lasting surface finish, corrosion resistance, strength, and precision required by most automotive applications. The potential value offered by our alloys is higher performance in some cases and cost reduction in others, the latter stemming from the ability of Liquidmetal alloys to be net shape molded into components, thus reducing costs of secondary processing common with existing processes.

Components for Non-Consumer Electronic Products

We work with partners to design, develop and supply components for non-consumer electronic devices utilizing our bulk Liquidmetal alloys and believe that our alloys offer enhanced performance and design benefits for these components in certain applications. Our strategic focus is primarily on parts that command a price commensurate with the performance advantages of our alloys. These product categories in the non-consumer electronics field include, but are not limited to, aerospace components, leisure products, and industrial machines. We believe that there are multiple applications and opportunities in the non-consumer electronics product category for us to produce parts that command the higher margin and premium prices consistent with our core business strategy.

We believe that the continued miniaturization of, and the introduction of advanced features to non-consumer electronic devices is a primary driver of growth, market share, and profits in our industry. The high strength-to-weight ratio and elastic limit, along with the processing advantages of bulk Liquidmetal alloys enable the production of smaller, thinner, but stronger electronic parts. We also believe that the strength characteristics of our alloys could facilitate the creation of a new generation of non-consumer electronic devices which currently may not be viable because of strength limitations of conventional metal parts in the marketplace today. Lastly, we believe that our alloys offer style and design flexibility, such as shiny metallic finishes, to accommodate the changing tastes of our customers.

On August 5, 2010, we entered into a license transaction with Apple Inc. (“Apple”) pursuant to which, for a one-time, upfront license fee, we granted to Apple a perpetual, worldwide, fully-paid, exclusive license to commercialize our intellectual property in the field of “consumer electronic” products, as defined in the license agreement. We continue to work with Apple to develop and advance research and development in the amorphous alloy space to benefit both consumer and non-consumer electronics fields. For more information regarding our transaction with Apple, see “ – Licensing Transactions” below.

Sporting Goods and Leisure Products

We are developing a variety of applications for Liquidmetal alloys in the sporting goods and leisure products area.

In the sporting goods industry, we believe that the high strength, hardness, corrosion resistance, and elasticity of our bulk alloys have the potential to enhance performance in a variety of products including, but not limited to, golf clubs, tennis rackets, archery, sporting arms and scuba equipment. We further believe that many sporting goods products are conducive to our strategy of focusing on high-margin products that meet our design criteria.

In the leisure products category, we believe that bulk Liquidmetal alloys can be used to efficiently produce intricately engineered designs with high-quality finishes, such as premium watchcases and knives. We further believe that Liquidmetal technology can be used to make high-quality, high-strength jewelry from precious metals.

Licensing Transactions

Eontec License Agreement

On March 10, 2016, in connection with the 2016 Purchase Agreement (defined below), we entered into a Parallel License Agreement (the “License Agreement”) with DongGuan Eontec Co., Ltd., a Hong Kong corporation (“Eontec”) pursuant to which we each entered into a cross-license of our respective technologies.

The License Agreement provides for the cross-license of certain patents, technical information, and trademarks between us and Eontec. In particular, we granted to Eontec a paid-up, royalty-free, perpetual license to our patents and related technical information to make, have made, use, offer to sell, sell, export, and import products in certain geographic areas outside of North America and Europe, and Eontec granted to us a paid-up, royalty-free, perpetual license to Eontec’s patents and related technical information to make, have made, use, offer to sell, sell, export, and import products in certain geographic areas outside of specified countries in Asia. The license granted by us to Eontec is exclusive (including to the exclusion of us) in the countries of Brunei, Cambodia, China (P.R.C and R.O.C.), East Timor, Indonesia, Japan, Laos, Malaysia, Myanmar, Philippines, Singapore, South Korea, Thailand, and Vietnam. The license granted by Eontec to us is exclusive (including to the exclusion of Eontec) in North America and Europe. The cross-licenses are non-exclusive in geographic areas outside of the foregoing exclusive territories.

Apple License Transaction

On August 5, 2010, we entered into a license transaction with Apple pursuant to which (i) we contributed substantially all of our intellectual property assets to a newly organized special-purpose, wholly-owned subsidiary, Crucible Intellectual Property, LLC (“CIP”), (ii) CIP granted to Apple a perpetual, worldwide, exclusive license to commercialize such intellectual property in the field of consumer electronic products, as defined in the license agreement, in exchange for a one-time, upfront license fee, and (iii) CIP granted back to us a perpetual, worldwide, fully-paid, exclusive license to commercialize such intellectual property in all other fields of use.

Under the agreements relating to the license transaction with Apple, we were obligated to contribute to CIP all intellectual property developed by us through February 2016. We are also obligated to maintain certain limited liability company formalities with respect to CIP at all times after the closing of the license transaction.

Swatch Group License

In March 2009, we entered into a license agreement with Swatch Group, Ltd. (“Swatch”) under which Swatch was granted a non-exclusive license to our technology to produce and market watches and certain other luxury products. In March 2011, this license agreement was amended to grant Swatch exclusive rights as to watches as against all third parties (including us), but non-exclusive as to Apple. We will receive royalty payments over the life of the contract on all Liquidmetal products produced and sold by Swatch. The license agreement with Swatch will expire on the expiration date of the last-to-expire licensed patent.

Liquidmetal Golf License

On January 13, 2022, our Liquidmetal Golf subsidiary (see below) entered into a sublicense agreement (“LMG Sublicense Agreement”) with Amorphous Technologies Japan, Inc. (“ATJ”), a newly formed Japanese entity that was established by Twins Corporation, a sporting goods company operating in Japan. Under the agreement, LMG granted to ATJ a nonexclusive worldwide sublicense to the Company’s amorphous alloy technology and related trademarks to manufacture and sell golf clubs and golf related products. The LMG Sublicense Agreement had an initial term of three years and has been extended for another three year term that provides for the payment of a running royalty to LMG of 3% of the net sales price of licensed products.

Our Intellectual Property

Our intellectual property consists of patents, trade secrets, know-how, and trademarks. Protection of our intellectual property is a strategic priority for our business, and we intend to vigorously protect our patents and other intellectual property. Our intellectual property portfolio includes more than 34 owned or licensed U.S. patents relating to the composition, processing, and application of our alloys, as well as more than 89 foreign counterpart patents and patent applications.

Our initial bulk amorphous alloy technology was developed by researchers at Caltech. We have acquired patent rights that provide us with the exclusive right to commercialize amorphous alloys and other amorphous alloy technology developed at Caltech through a license agreement (“Caltech License Agreement”) with Caltech. In addition to the patents and patent applications that we license from Caltech, we are building a portfolio of our own patents to expand and enhance our technology position. These patents and patent applications primarily relate to various applications of our bulk amorphous alloys and the processing of our alloys. The patents expire on various dates between 2026 and 2040. Our policy is to seek patent protection for all technology, inventions, and improvements that are of commercial importance to the development of our business, except to the extent that we believe it is advisable to maintain such technology or invention as a trade secret.

In order to protect the confidentiality of our technology, including trade secrets, know-how, and other proprietary technical and business information, we require that all of our employees, consultants, advisors and collaborators enter into confidentiality agreements that prohibit the use or disclosure of information that is deemed confidential. The agreements also obligate our employees, consultants, advisors and collaborators to assign to us developments, discoveries and inventions made by such persons in connection with their work with us.

Research and Development

We have engaged in limited research and development programs that were driven by the following key objectives:

- *Enhance Material Processing and Manufacturing Efficiencies.* We are working with our strategic partners to enhance material processing and manufacturing efficiencies. We plan to continue research and development of processes and compositions that will decrease our cost of making products from Liquidmetal alloys.

- *Develop New Applications.* We will continue the research and development of new applications for Liquidmetal alloys. We believe the range of potential applications will broaden as we expand the forms, compositions, and methods of processing of our alloys.

In addition to our internal research and development efforts, we enter into cooperative research and development relationships with leading academic institutions. We have entered into development relationships with other companies for the purpose of identifying new applications for our alloys and establishing customer relationships with such companies. Some of our product development programs are partially funded by our customers. We are also engaged in negotiations with other potential customers regarding possible product development relationships. Our research and development expenses for the years ended December 31, 2025 and 2024 were \$14 and \$19, respectively.

Raw Materials

Liquidmetal alloy compositions are comprised of many elements, many of which are generally available commodity products. While we believe that each of these raw materials is readily available in sufficient quantities from multiple sources on commercially acceptable terms, we continue to seek opportunities to secure stocks of essential elements in advance to manage lead-times and cost. Due to our inherent dependency on these alloy compositions for the manufacture of Liquidmetal products, any substantial increase in the price or interruption in the supply of these materials could have an adverse effect on our business.

Manufacturing

Our current manufacturing strategy is to have in-house manufacturing operations and to also seek to partner with global companies that are contract manufacturers and alloy producers. We seek third party companies with proven track records of success who can gain specialized skills and knowledge of our alloys through close collaborations with our team of engineers. We believe that in addition to having our own manufacturing operations, partnering with global companies will allow us to forgo the capital intensive requirements of large scale manufacturing facilities and allow us to grow the number of applications for the technology much faster than could be accomplished on our own.

On January 12, 2022, Liquidmetal Technologies entered into a manufacturing agreement (“Manufacturing Agreement”) with Dongguan Yihao Metal Materials Technology Co. Ltd. (“Yihao”) to become an outsourced manufacturer of the Company’s products. Under the Manufacturing Agreement, which has a term of five years, Yihao has agreed to serve as a non-exclusive contract manufacturer for amorphous alloy parts offered and sold by the Company at prices determined on a “cost-plus” basis. Yihao is an affiliate of Dongguan Eontec Co. Ltd. and Professor Lugee Li, our Chairman and largest beneficial owner of the Company’s capital stock.

On July 4, 2025, Liquidmetal Asia Holdings Limited (“Liquidmetal Asia”), a Hong Kong incorporated wholly owned subsidiary of the Company, entered into a shareholders agreement with Mr. Chong Liu, an individual investor to form a new joint venture company named Hangzhou Feifeng Liquidmetal Co. Ltd., a limited liability company formed under the Peoples Republic of China (the “Joint Venture Company”). The Joint Venture Company was formed for the principal purpose of developing a manufacturing facility in Hangzhou, China for the manufacture of amorphous metal products. The Joint Venture Company will be owned 70% by Liquidmetal Asia and 30% by Mr. Liu and will be capitalized with \$6.0 million USD of initial capital, of which \$4.2 million has been contributed by Liquidmetal Asia, and \$1.8 million will be contributed by Mr. Liu on or before May 25, 2028. We currently anticipate that the Joint Venture Company will have full manufacturing capabilities in 2026. The Joint Venture Company and Shareholders Agreement will have an initial term of fifty years, provided that either Shareholder may terminate the Shareholders Agreement and Joint Venture Company earlier under certain circumstances, including if the Joint Venture Company experiences a net loss for three consecutive years or if the other Shareholder attempts to assign its interest in the Joint Venture Company in violation of the terms of the agreement.

Customers

During 2025, we had three major customers which together accounted for 86% of our revenue. During 2024, we had three major customers which together accounted for 91% of our revenue. As of December 31, 2025, one customer represented 60%, or \$54,280 of the total outstanding trade accounts receivable. As of December 31, 2024, one customer represented 83%, or \$73,600 of the total outstanding trade accounts receivable. In the future, we expect that a significant portion of our revenue may continue to be concentrated in a limited number of customers, even if our bulk alloys business grows.

Competition

Our bulk Liquidmetal alloys face competition from other materials, including metals, alloys, plastics and composites, which are currently used in the commercial applications that we pursue. For example, we face significant competition from plastics, zinc and stainless steel in our non-consumer electronics components business, and titanium and composites will continue to be used widely in medical devices and sporting goods. Many of these competitive materials are produced by domestic and international companies that have substantially greater financial and other resources than we do. Based on our experience developing products for a variety of customers, we believe that the selection of materials by potential customers will continue to be product-specific in nature, with the decision for each product being driven primarily by the performance needs of the application and, secondarily, by cost considerations and design flexibility. Because of the relatively high strength of our alloys, dimensional precision, and the design flexibility of our process, we are most competitive when the customer is seeking a higher strength, as well as greater design flexibility, than currently available with other materials. However, if currently available materials, such as plastics, are strong enough for the application, our alloys are often not competitive in those applications with respect to price. We also believe that our alloys are generally not competitive with the cost of some of the basic metals, such as steel, aluminum or copper, when such basic metals can be processed by simple traditional metalworking processes into shapes and components that are satisfactory for their intended applications. Our alloys are generally more competitive with respect to price compared to components machined from various metals, such as titanium, stainless steel and other higher performance crystalline metals. Our alloys could also face competition from new materials that may be developed in the future, including new materials that could render our alloys obsolete.

We experience and will continue to experience indirect competition from the competitors of our customers. Because we rely on our customers to market and sell finished goods that incorporate our components or products, our success will depend in part on the ability of our customers to effectively market and sell their own products and compete in their respective markets.

Backlog

Because of the minimal lead-time associated with orders of bulk alloy parts, we generally do not carry a significant backlog. The backlog as of any particular date gives no indication of actual sales for any succeeding period.

Sales and Marketing

We direct our marketing efforts towards customers that will incorporate our components and products into their finished goods. Our goal is to educate customers on the benefits of our technology and help them gain adequate knowledge to apply the technology to their upcoming product application designs. To that end, we have business development personnel who, in conjunction with engineers and scientists, will actively identify potential customers that may be able to benefit from the introduction of Liquidmetal alloys to their products. We currently have 4 full-time individuals engaged in our internal sales, business development and marketing activities. In addition, we work closely with a team of more than 10 external sales representatives covering the territories of North America and Europe.

Human Capital

As of December 31, 2025, we had 7 full-time employees and 2 part-time consultants for our U.S. corporate office, and 3 full-time employees in our manufacturing operations in China. As of that date, none of our employees or consultants were represented by a labor union. We have not experienced any work stoppages, and we consider our employee and consultant relations to be favorable. We endeavor to maintain a workplace that is free from discrimination or harassment on the basis of color, race, sex, national origin, ethnicity, religion, age, disability, sexual orientation, gender identification or expression or any other status protected by applicable law. The basis for recruitment, hiring, development, training, compensation and advancement is a person's qualifications, performance, skills and experience. We believe that our employees are fairly compensated, without regard to gender, race and ethnicity, and routinely recognized for outstanding performance.

Governmental Regulation

Government regulation of our products will depend on the nature and type of product and the jurisdictions in which the products are sold. For example, medical instruments incorporating our Liquidmetal alloys will be subject to regulation in the United States by the Food and Drug Administration ("FDA") and corresponding state and foreign regulatory agencies. Medical device manufacturers to whom we intend to sell our products may need to obtain FDA approval before marketing their medical devices that incorporate our products and may need to obtain similar approvals before marketing these medical device products in foreign countries.

Environmental Law Compliance

Our operations are subject to national, state, and local environmental laws in the United States. We believe that we are in material compliance with all applicable environmental regulations. While we continue to incur costs to comply with environmental regulations, we do not believe that such costs will have a material effect on our capital expenditures, earnings, or competitive position.

Liquidmetal Golf

Liquidmetal Golf Inc. ("Liquidmetal Golf" or "LMG") is a majority-owned subsidiary which has the exclusive right and license to utilize our Liquidmetal alloy technology for purposes of golf equipment applications. This right and license is set forth in an intercompany license agreement dated January 1, 2002 between Liquidmetal Technologies and Liquidmetal Golf. This license agreement provides that Liquidmetal Golf has a perpetual and exclusive license to use Liquidmetal alloy technology for the purpose of manufacturing, marketing, and selling golf club components and other products used in the sport of golf. We own 79% of the outstanding common stock in Liquidmetal Golf.

Item 1A. Risk Factors

Investing in our securities involves a high degree of risk. The risks described below are not the only ones facing us. Additional risks not currently known to us or that we currently believe are immaterial also may impair our business, operations, liquidity and stock price materially and adversely. You should carefully consider the risks and uncertainties described below in addition to the other information included or incorporated by reference in this Annual Report on Form 10-K. If any of the following risks actually occur, our business, financial condition or results of operations would likely suffer. In that case, the trading price of our common stock could fall and you could lose all or part of your investment.

Risk Related to Our Company and Business

We have incurred significant operating losses in the past and may not be able to achieve or sustain profitability in the future.

We have experienced significant cumulative operating losses since our inception. Our operating loss for the years ended December 31, 2025 and 2024 were \$3,742 and \$3,313, respectively. We had an accumulated deficit of approximately \$280,594 at December 31, 2025, and approximately \$278,253 at December 31, 2024. We anticipate that we may continue to incur operating losses for the foreseeable future. Consequently, it is possible that we may never achieve positive earnings and, if we do achieve positive earnings, we may not be able to achieve them on a sustainable basis.

We have a limited history of developing and selling products made from our bulk amorphous alloys.

We have a relatively limited history of producing bulk amorphous alloy components and products on a mass-production scale. Furthermore, our suppliers' ability to produce our products in desired quantities and at commercially reasonable prices is uncertain and is dependent on a variety of factors that are outside of its control, including the nature and design of the component, the customer's specifications, and required delivery timelines.

We rely on assumptions about the markets for our products and components that, if incorrect, may adversely affect our profitability.

We have made assumptions regarding the market size for, and the manufacturing requirements of, our products and components based in part on information we received from third parties and also from our limited history. If these assumptions prove to be incorrect, we may not achieve anticipated market penetration, revenue targets or profitability.

Our historical results of operations may not be indicative of our future results.

As a result of our limited history of developing and marketing bulk amorphous alloy components and products, as well as our new manufacturing strategy of partnering with contract manufacturers and alloy producers, our historical results of operations may not be indicative of our future results.

We primarily rely on limited suppliers for mold making, manufacturing and alloying of our bulk amorphous alloys and parts.

We currently have one supplier located in China who fulfills the alloying, mold making and manufacturing of our bulk amorphous alloy parts. Our supplier may allocate its limited capacity to fulfill the production requirements of its other customers. In the event of a disruption of the operations of our supplier related to limited capacity, as well as other geo-political issues, including changes in diplomatic and trade relationships, and the impositions of tariffs, sanctions, duties, exchange controls or other trade restrictions, we may not have other manufacturing sources immediately available. Such events could cause significant delays in shipments and may adversely affect our revenue, cost of goods sold and results of operations.

Our current anticipation that the Joint Venture Company will have full manufacturing capabilities in 2026 could be incorrect and may adversely affect our future results

The development of our Joint Venture Company manufacturing facility in Hangzhou, China is subject to a variety of risks, including delays in obtaining necessary permits and approvals, unforeseen engineering or environmental problems, geo-political issues, changes in Chinese laws, regulations, or government policies affecting foreign investment, labor disputes, shortages of materials and skilled labor, cost overruns, failure of our joint venture partner to make required capital contributions, and other factors beyond our control. In the event of a delay in the development of the manufacturing facility, or if the development is unsuccessful, we may not achieve our anticipated manufacturing capabilities in 2026, which could impair our ability to meet customer demand and could have a material adverse effect on our business, financial condition, and results of operations.

Risk Related to Customer Relationships

If we cannot establish and maintain relationships with customers that incorporate our components and products into their finished goods, we will not be able to increase our revenue and commercialize our products.

Our business is based upon the commercialization of new and unique materials technology. Our ability to increase our revenues will depend on our ability to successfully maintain and establish relationships with customers who are willing to incorporate our proprietary alloys and technology into their finished products. However, we believe that the size of our company and the novel nature of our technology and manufacturing process may continue to make it challenging to maintain and establish such relationships. In addition, we rely and will continue to rely to a large extent on the manufacturing, research, and development capabilities, as well as the marketing and distribution capabilities, of our customers in order to commercialize our products. Our future growth and success will depend in large part on our ability to enter into these relationships and the subsequent success of these relationships. Even if our products are selected for use in a customer's products, we still may not realize significant revenue from that customer if that customer's products are not commercially successful.

It may take significant time and cost for us to develop new customer relationships, which may delay our ability to generate additional revenue or achieve profitability.

Our ability to generate revenue from new customers is generally affected by the amount of time it takes for us to, among other things:

- identify a potential customer and introduce the customer to Liquidmetal alloys;
- work with the customer to select and design the parts to be fabricated from Liquidmetal alloys;
- make the molds and tooling to be used to produce the selected part;
- make prototypes and samples for customer testing;
- work with our customers to test and analyze prototypes and samples; and
- with respect to some types of products, such as medical devices, obtain regulatory approvals.

We believe that our average sales cycle (the time we deliver a proposal to a customer until the time our customer fully integrates our Liquidmetal alloys into its product) could be a significant period of time. Our history to date has demonstrated that the sales cycle could extend beyond one year. The time it takes to transition a customer from limited production to full-scale production runs will depend upon the nature of the processes and products into which our Liquidmetal alloys are integrated. Moreover, we have found that customers often proceed very cautiously and slowly before incorporating a fundamentally new and unique type of material into their products.

After we develop a customer relationship, it may take a significant amount of time for that customer to develop, manufacture, and sell finished goods that incorporate our components and products.

Our experience has shown that our customers will perform numerous tests and extensively evaluate our components and products before incorporating them into their finished products. The time required for testing, evaluating, and designing our components and products into a customer's products, and in some cases, obtaining regulatory approval, can be significant, with an additional period of time before a customer commences volume production of products incorporating our components and products, if ever. Moreover, because of this lengthy development cycle, we may experience a delay between the time we accrue expenses for research and development and sales and marketing efforts and the time when we generate revenue, if any. We may incur substantial costs in an attempt to transition a customer from initial testing to prototype and from prototype to final product. If we are unable to minimize these transition costs, or to recover the costs of these transitions from our customers, our operating results will be adversely affected.

A limited number of our customers generate a significant portion of our revenue.

For the near future, we expect that a significant portion of our revenue may be concentrated in a limited number of customers. A reduction, delay, or cancellation of orders from one or more of these customers or the loss of one or more customer relationships could significantly reduce our revenue and harm our business. Unless we establish long-term sales arrangements with these customers, they will have the ability to reduce or discontinue their purchases of our products on short notice.

We expect to rely on our customers and licensees to market and sell finished goods that incorporate our products and components, a process over which we will have little control.

Our future revenue growth and ultimate profitability will depend in part on the ability of our customers and licensees to successfully market and sell their finished goods that incorporate our products. We may have little control over our customers' and licensees' marketing and sales efforts. These marketing and sales efforts may be unsuccessful for various reasons, any of which could hinder our ability to increase revenue or achieve profitability. For example, our customers may not have or devote sufficient resources to develop, market, and sell their finished goods that incorporate our products. Because we typically will not have exclusive sales arrangements with our customers, they will not be precluded from exploring and adopting competing technologies. Also, products incorporating competing technologies may be more successful for reasons unrelated to the performance of Liquidmetal products or the marketing efforts of our customers and licensees.

Risk Related to Technological and Intellectual Property

Our growth depends on our ability to identify, develop, and commercialize new applications for our technology.

Our future growth and success will depend in part on our ability to identify, develop, and commercialize, either alone or in conjunction with our customers and partners, new applications and uses for Liquidmetal alloys. If we are unable to identify and develop new applications, we may be unable to develop new products or generate additional revenue. Successful development of new applications for our products may require additional investment, including costs associated with research and development and the identification of new customers. In addition, difficulties in developing and achieving market acceptance of new products would harm our business.

We may not be able to effectively compete with current suppliers of incumbent materials or producers of competing products.

The future growth and success of our Liquidmetal alloy business will depend in part on our ability to establish and retain a technological advantage over other materials for our targeted applications. For many of our targeted applications, we will compete with manufacturers of similar products that use different materials many of which have substantially greater financial and other resources than we do. These different materials may include plastics, zinc, titanium alloys, metal injection molding, or stainless steel, among others, and we will compete directly with suppliers of the incumbent material. In addition, in each of our targeted markets, our success will depend in part on the ability of our customers to compete successfully in their respective markets. Thus, even if we are successful in replacing an incumbent material in a finished product, we will remain subject to the risk that our customer will not compete successfully in its own market.

Our bulk amorphous alloy technology is still at an early stage of commercialization relative to many other materials.

Our bulk amorphous alloy technology is a relatively new technology as compared to many other material technologies, such as plastics and widely-used high-performance crystalline alloys. Historically, the successful commercialization of a new material technology has required the persistent improvement and refining of the technology over a sometimes lengthy period of time. Accordingly, we believe that our company's future success will be dependent on our ability to continue expanding and improving our technology platform by, among other things, constantly refining and improving our processes, optimizing our existing amorphous alloy compositions for various applications, and developing and improving new bulk amorphous alloy compositions. Our failure to further expand our technology base could limit our growth opportunities and hamper our commercialization efforts.

Future advances in materials science could render Liquidmetal alloys obsolete.

Academic institutions and business enterprises frequently engage in the research and testing of new materials, including alloys and plastics. Advances in materials science could lead to new materials that have a more favorable combination of performance, processing, and cost characteristics than our alloys. The future development of any such new materials could render our alloys obsolete and unmarketable or may impair our ability to compete effectively.

Risks Related to Human Resources

Our growth depends upon our ability to retain and attract a sufficient number of qualified employees.

Our business is based upon the commercialization of a new and unique materials technology. Our future growth and success will depend in part on our ability to retain key members of our management and engineering staff, who are familiar with this technology and the potential applications and markets for it. We do not have "key man" or similar insurance on any of the key members of our management and engineering staff. If we lose their services or the services of other key personnel, our financial results or business prospects may be harmed. Additionally, our future growth and success will depend in part on our ability to attract, train, and retain scientific engineering, manufacturing, sales, marketing, and management personnel. We cannot be certain that we will be able to attract and retain the personnel necessary to manage our operations effectively. Competition for experienced executives and engineers from numerous companies and academic and other research institutions may limit our ability to hire or retain personnel on acceptable terms. In addition, many of the companies with which we compete for experienced personnel have greater financial and other resources than we do. Moreover, the employment of otherwise highly qualified non-U.S. citizens may be restricted by applicable immigration laws.

We may not be able to successfully identify, consummate, integrate, or derive benefit from strategic partnerships.

As part of our business strategy, we intend to pursue strategic partnering transactions that provide access to new technologies, products, markets, and manufacturing capabilities. These transactions could include licensing agreements, joint ventures, or business combinations. We believe that these transactions will be particularly important to our future growth and success due to the size and resources of our company and the novel nature of our technology. For example, we may determine that we may need to license our technology to a larger manufacturer in order to penetrate a particular market. In addition, we may pursue transactions that will give us access to new technologies that are useful in connection with the composition, processing, or application of Liquidmetal alloys. We may not be able to successfully identify any potential strategic partnerships. Even if we do identify one or more potentially beneficial strategic partners, we may not be able to consummate transactions with these strategic partners on favorable terms or obtain the benefits we anticipate from such a transaction.

Risks Related to Our Global Business, Litigation, Laws and Regulation**We may derive some portion of our revenue from sales outside the United States, which may expose the Company to foreign commerce risks.**

We may sell a portion of our products to customers outside of the United States, and our operations and revenue may be subject to risks associated with foreign commerce, including transportation delays and foreign tax and legal compliance. Moreover, customers may sell finished goods that incorporate our components and products outside of the United States, which indirectly expose us to additional foreign commerce risks.

Changes in U.S. and foreign government administrative policy, including the imposition of or increases in tariffs and changes to existing trade agreements could have a material adverse effect on us.

The United States has imposed tariffs on certain items imported from various countries where we currently sell or in the past sold our products. Since January 2025, the Trump Administration has significantly expanded and modified these tariff policies, creating an evolving landscape of trade restrictions and uncertainty. As a result of changes to U.S. and foreign government administrative policy, there may be changes to existing trade agreements, greater restrictions on free trade generally, the imposition of or significant increases in tariffs on goods imported into the U.S., including tariffs on products manufactured in China, and adverse responses by foreign governments to U.S. trade policies, among other possible changes. A trade war, other governmental action related to tariffs or trade agreements, changes in U.S. social, political, regulatory and economic conditions or in laws and policies governing foreign trade, manufacturing, development and investment in the territories and countries where we currently purchase, manufacture and sell products, and any resulting negative sentiments towards the U.S. as a result of such changes, could have a material adverse effect on our business, financial condition, results of operations and cash flows.

A substantial increase in the price or interruption in the supply of raw materials for our alloys could have an adverse effect on our profitability.

Our proprietary alloy compositions are comprised of many elements, all of which are generally available commodity products. Although we believe that each of these raw materials is currently readily available in sufficient quantities from multiple sources on commercially acceptable terms, if the prices of these materials substantially increase or there is an interruption in the supply of these materials, such increase or interruption could adversely affect our profitability. For example, if the price of one of the elements included in our alloys substantially increases, we may not be able to pass the price increase on to our customers.

Our business could be subject to the potentially adverse consequences of exchange rate fluctuations.

We expect to conduct business in various foreign currencies and will be exposed to market risk from changes in foreign currency exchange rates and interest rates. Fluctuations in exchange rates between the U.S. dollar and such foreign currencies may have a material adverse effect on our business, results of operations, and financial condition and could specifically result in foreign exchange gains and losses. The impact of future exchange rate fluctuations on our operations cannot be accurately predicted. To the extent that the percentage of our non-U.S. dollar revenue derived from international sales increases in the future, our exposure to risks associated with fluctuations in foreign exchange rates will increase further.

Our inability to protect our licenses, patents, trademarks, and proprietary rights in the United States and foreign countries could harm our business.

We own several patents relating to amorphous alloy technology, and we have other rights to amorphous alloy patents through an exclusive license from Caltech. Our success depends in part on our ability to obtain and maintain patent and other proprietary right protection for our technologies and products in the United States and other countries. If we are unable to obtain or maintain these protections, we may not be able to prevent third parties from using our proprietary rights. Specifically, we must:

- protect and enforce our owned and licensed patents and intellectual property;
- exploit our owned and licensed patented technology; and

- operate our business without infringing on the intellectual property rights of third parties.

Our licensed technology is comprised of several issued United States patents covering the composition, method of manufacturing, and application and use of the family of Liquidmetal alloys. We also hold several United States and corresponding foreign patents covering the manufacturing processes of Liquidmetal alloys and their use. Those patents have expiration dates between 2025 and 2040. The laws of some foreign countries do not protect proprietary rights to the same extent as the laws of the United States, and we may encounter significant problems and costs in protecting our proprietary rights in these foreign countries.

In August 2010, we entered into a license transaction with Apple pursuant to which (i) we contributed substantially all of our intellectual property assets to a special-purpose, wholly-owned subsidiary, Crucible Intellectual Property (“CIP”), (ii) CIP granted to Apple a perpetual, worldwide, fully-paid, exclusive license to commercialize such intellectual property in the field of consumer electronic products, as defined in the license agreement, and (iii) CIP granted back to us a perpetual, worldwide, fully-paid, exclusive license to commercialize such intellectual property in all other fields of use.

Patent law is still evolving relative to the scope and enforceability of claims in the fields in which we operate. Our patent protection involves complex legal and technical questions. Our patents and those patents for which we have license rights may be challenged, narrowed, invalidated, or circumvented. We may be able to protect our proprietary rights from infringement by third parties only to the extent that our proprietary technologies are covered by valid and enforceable patents or are effectively maintained as trade secrets. Furthermore, others may independently develop similar or alternative technologies or design around our patented technologies. Litigation or other proceedings to defend or enforce our intellectual property rights could require us to spend significant time and money and could otherwise adversely affect our business.

Other companies or individuals may claim that we infringe their intellectual property rights, which could cause us to incur significant expenses or prevent us from selling our products.

Our success depends, in part, on our ability to operate without infringing on valid, enforceable patents or proprietary rights of third parties and without breaching any licenses that may relate to our technologies and products. Future patents issued to third parties may contain claims that conflict with our patents and that compete with our products and technologies, and third parties could assert infringement claims against us. Any litigation or interference proceedings, regardless of their outcome, may be costly and may require significant time and attention from our management and technical personnel. Litigation or interference proceedings could also force us to:

- stop or delay using our technology;
- stop or delay our customers from selling, manufacturing or using products that incorporate the challenged intellectual property;
- pay damages; or
- enter into licensing or royalty agreements that may be unavailable on acceptable terms.

Evolving regulation of corporate governance and public disclosure may result in additional expenses and continuing uncertainty.

Changing laws, regulations and standards relating to corporate governance and public disclosure, including the SEC XBRL mandate, new SEC regulations and International Financial Reporting Standards (“IFRS”), are creating uncertainty for public companies. As a result of these new rules and the size and limited resources of our company, we will incur additional costs associated with our public company reporting requirements, and we may not be able to comply with some of these new rules. In addition, these new rules could make it more difficult or more costly for us to obtain certain types of insurance, including director and officer liability insurance, and this could make it difficult for us to attract and retain qualified persons to serve on our board of directors.

We are presently evaluating and monitoring developments with respect to new and proposed rules and cannot predict or estimate the amount of the additional costs we may incur or the timing of such costs. These new or changed laws, regulations, and standards are subject to varying interpretations, in many cases due to their lack of specificity, and as a result, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoing revisions to disclosure and governance practices.

We are committed to maintaining high standards of corporate governance and public disclosure. As a result, we intend to invest resources to comply with evolving laws, regulations, and standards, and this investment may result in increased general and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities. If our efforts to comply with new or changed laws, regulations, and standards differ from the activities intended by regulatory or governing bodies due to ambiguities related to practice, regulatory authorities may initiate legal proceedings against us and our business may be harmed.

The time and cost associated with complying with government regulations to which we could become subject could have a material adverse effect on our business.

Some of the applications for our Liquidmetal alloys that we have identified or may identify in the future may be subject to government regulations. For example, any medical devices made from our alloys likely will be subject to extensive government regulation in the United States by the FDA. Any medical device manufacturers to whom we sell Liquidmetal alloy products may need to comply with FDA requirements, including premarket approval or clearance under Section 510(k) of the Food Drug and Cosmetic Act, before marketing Liquidmetal alloy medical device products in the United States. These medical device manufacturers may be required to obtain similar approvals before marketing these medical devices in foreign countries. Any medical device manufacturers with which we jointly develop and sell medical device products may not provide significant assistance to us in obtaining required regulatory approvals. The process of obtaining and maintaining required FDA and foreign regulatory approvals could be lengthy, expensive, and uncertain. Additionally, regulatory agencies can delay or prevent product introductions. The failure to comply with applicable regulatory requirements can result in substantial fines, civil and criminal penalties, stop sale orders, loss or denial of approvals, recalls of products, and product seizures.

To the extent that our products have the potential for dual use, such as military and non-military applications, they may be subject to import and export restrictions of the U.S. government, as well as other countries. The process of obtaining any required U.S. or foreign licenses or approvals could be time-consuming, costly, and uncertain. Failure to comply with import and export regulatory requirements can lead to substantial fines, civil and criminal penalties, and the loss of government contracting and export privileges.

Risk Related to Stock Ownership and Corporate Governance

The existence of minority shareholders in our Liquidmetal Golf subsidiary creates potential for conflicts of interest.

We directly own 79% of the outstanding capital stock of Liquidmetal Golf, our subsidiary that has the exclusive right to commercialize our technology in the golf market. The remaining 21% of the Liquidmetal Golf stock is owned by approximately 95 shareholders of record. As a result, conflicts of interest may develop between us and the minority shareholders of Liquidmetal Golf. To the extent that our officers and directors are also officers or directors of Liquidmetal Golf, matters may arise that place the fiduciary duties of these individuals in conflicting positions.

Our executive officers, directors and insiders and entities affiliated with them hold a significant percentage of our common stock, and these shareholders may take actions that may be adverse to your interests.

As of December 31, 2025, our executive officers, directors and insiders and entities affiliated with them, in the aggregate, beneficially owned approximately 26.3% of our common stock. As a result, these shareholders, acting together, will be able to significantly influence all matters requiring shareholder approval, including the election and removal of directors and approval of significant corporate transactions such as mergers, consolidations and sales of assets. They also could dictate the management of our business and affairs. This concentration of ownership could have the effect of delaying, deferring or preventing a change in control or impeding a merger or consolidation, takeover or other business combination, which could cause the market price of our common stock to fall or prevent you from receiving a premium in such a transaction.

Our stock price has experienced volatility and may continue to experience volatility.

During 2025, the highest bid price for our common stock was \$0.16 per share, while the lowest bid price during that period was \$0.04 per share. The trading price of our common stock could continue to fluctuate widely due to:

- limited current liquidity and the possible need to raise additional capital;
- quarter-to-quarter variations in results of operations;
- announcements of technological innovations by us or our potential competitors;
- changes in or our failure to meet the expectations of securities analysts;
- new products offered by us or our competitors;
- announcements of strategic relationships or strategic partnerships;
- future sales of common stock, or securities convertible into or exercisable for common stock;
- adverse judgments or settlements obligating us to pay damages;

- future issuances of common stock in connection with acquisitions or other transactions;
- acts of war, terrorism, or natural disasters;
- low trading volume in our stock;
- developments relating to patents or property rights;
- government regulatory changes; or
- other events or factors that may be beyond our control.

In addition, the securities markets in general have experienced extreme price and trading volume volatility in the past. The trading prices of securities of many companies at our stage of growth have fluctuated broadly, often for reasons unrelated to the operating performance of the specific companies. These general market and industry factors may adversely affect the trading price of our common stock, regardless of our actual operating performance. If our stock price is volatile, we could face securities class action litigation, which could result in substantial costs and a diversion of management's attention and resources and could cause our stock price to fall.

Future sales of our common stock could depress our stock price.

Sales of a large number of shares of our common stock, or the availability of a large number of shares for sale, could adversely affect the market price of our common stock and could impair our ability to raise funds in additional stock offerings. In the event that we propose to register additional shares of common stock under the Securities Act of 1933 for our own account, certain shareholders are entitled to receive notice of that registration and to include their shares in the registration, subject to limitations described in the agreements granting these rights.

A limited public trading market exists for our common stock, which makes it more difficult for our shareholders to sell their common stock in the public markets.

Our common stock is currently traded under the symbol "LQMT" and currently trades at a low volume, based on quotations on the "Over-the-Counter" exchanges, meaning that the number of persons interested in purchasing our common stock at or near bid prices at any given time may be relatively small or non-existent. This situation is attributable to a number of factors, including the fact that we are a small company which is still relatively unknown to stock analysts, stock brokers, institutional investors, and others in the investment community that generate or influence sales volume, and that even if we came to the attention of such persons, they tend to be risk-averse and might be reluctant to follow an unproven company such as ours or purchase or recommend the purchase of our stock until such time as we became more viable. Additionally, many brokerage firms may not be willing to effect transactions in our securities. As a consequence, there may be periods of several days or more when trading activity in our stock is minimal or non-existent, as compared to a seasoned issuer which has a large and steady volume of trading activity that will generally support continuous sales without an adverse effect on share price. We cannot give you any assurance that a broader or more active public trading market for our common stock will develop or be sustained, or that trading levels will be sustained.

We have never paid dividends on our common stock, and we do not anticipate paying any cash dividends in the foreseeable future.

We have paid no cash dividends on our common stock to date. We currently intend to retain our future earnings, if any, to fund the development and growth of our businesses, and we do not anticipate paying any cash dividends on our capital stock for the foreseeable future. In addition, the terms of existing or any future debts may preclude us from paying dividends on our stock. As a result, capital appreciation, if any, of our common stock will be the sole source of gain for the foreseeable future for our common shareholders.

FINRA sales practice requirements may also limit a shareholder's ability to buy and sell our stock.

The Financial Industry Regulatory Authority ("FINRA") has adopted rules that require a broker-dealer to have reasonable grounds for believing that an investment is suitable for a customer prior to recommending the investment to such customer. Prior to recommending speculative low priced securities to their non-institutional customers, broker-dealers must make reasonable efforts to obtain information about the customer's financial status, tax status, investment objectives and other information. Under interpretations of these rules, FINRA believes that there is a high probability that speculative low priced securities will not be suitable for at least some customers. The FINRA requirements make it more difficult for broker-dealers to recommend that their customers buy our common stock, which may limit your ability to buy and sell our stock and have an adverse effect on the market for our shares.

Antitakeover provisions of our certificate of incorporation and bylaws and provisions of applicable corporate law could delay or prevent a change of control that you may favor.

Provisions in our certificate of incorporation, our bylaws, and Delaware law could make it more difficult for a third party to acquire us, even if doing so would be beneficial to our shareholders. These provisions could discourage potential takeover attempts and could adversely affect the market price of our shares. Because of these provisions, you might not be able to receive a premium on your investment in such a transaction. These provisions:

- authorize our board of directors, without shareholder approval, to issue up to 10,000,000 shares of “blank check” preferred stock that could be issued by our board of directors to increase the number of outstanding shares and prevent a takeover attempt;
- limit shareholders’ ability to call a special meeting of our shareholders; and
- establish advance notice requirements to nominate directors for election to our board of directors or to propose matters that can be acted on by shareholders at shareholder meetings.

The provisions described above, as well as other provisions in our certificate of incorporation, our bylaws, and Delaware law could delay or make more difficult transactions involving a change in control of us or our management.

We rely extensively on information technology in our operations, and any material failure, inadequacy, interruption, or security breach of that technology could have a material adverse impact on our business.

We rely extensively on information technology systems across our operations, including reporting results of operations, collection and storage of personal data of customers, employees and other stakeholders, and various other processes and transactions. Some of these systems are managed by third-party service providers. We use third-party technology and systems for a variety of reasons, including, without limitation, encryption and authentication technology, employee email, content delivery to customers, back-office support, and other functions. Failure to follow applicable regulations related to those activities, or to prevent or mitigate data loss or other security breaches, including breaches of our business partners’ technology and systems could expose us and/or our customers and vendors to a risk of loss or misuse of such information, which could adversely affect our operating results, result in regulatory enforcement, other litigation and potential liability, and otherwise harm our business. Our ability to effectively manage our business and coordinate the production, distribution, and sale of our products depends significantly on the reliability and capacity of these systems and third-party service providers. Although we have developed systems and processes that are designed to protect customer information and prevent data loss and other security breaches, including systems and processes designed to reduce the impact of a security breach at a third-party service provider, such measures cannot provide absolute security.

We have exposure to similar security risks faced by other companies that have data stored on their information technology systems. To our knowledge, we have not experienced any material breach of our cybersecurity systems. If we or our third-party service providers systems fail to operate effectively or are damaged, destroyed, or shut down, or there are problems with transitioning to upgraded or replacement systems, or there are security breaches in these systems, we could experience delays or decreases in product sales, and reduced efficiency of our operations. Any of the aforementioned could occur as a result of natural disasters, software or equipment failures, telecommunications failures, loss or theft of equipment, acts of terrorism, circumvention of security systems, or other cyber-attacks, including denial-of-service attacks. Additionally, any of these events could lead to violations of privacy laws, loss of customers, or loss, misappropriation or corruption of confidential information, trade secrets or data, which could expose us to potential litigation, regulatory actions, sanctions or other statutory penalties, any or all of which could adversely affect its business, and cause it to incur significant losses and remediation costs.

We will rely on the manufacturing operations of a third party controlled by our largest stockholder and Chairman, which presents a potential conflicts of interest.

We currently rely on Yihao to manufacture our products. Yihao is an affiliate of Dongguan Eontec Co. Ltd. and Professor Li our Chairman and is indirectly controlled by Professor Li. Professor Li, through his affiliates, is the largest beneficial owner of our common stock and owns approximately 24.7% of our common stock and is able to exercise significant influence over all matters affecting us, including the election of directors, formation and execution of business strategy and approval of mergers, acquisitions and other significant corporate transactions, which may have an adverse effect on our stock price and ability to execute our strategic initiatives. As a result of this significant ownership and his affiliation with Yihao, as well as the future importance of Yihao as a manufacturer of the Company’s products, Professor Li may have conflicts of interest and interests that are not aligned with those of other stockholders of the Company.

Item 1B. Unresolved Staff Comments

None.

Item 1C. Cybersecurity

Risk Management and Strategy

We have developed and implemented a cybersecurity risk management program intended to protect the confidentiality, integrity, and availability of our critical systems and information. Our cybersecurity risk management program includes a cybersecurity incident response plan.

We design and assess our program based on the National Institute of Standards and Technology Cybersecurity Framework, or NIST CSF. This does not imply that we meet any particular technical standards, specifications, or requirements, only that we use the NIST CSF as a guide to help us identify, assess, and manage cybersecurity risks relevant to our business.

Our cybersecurity risk management program is integrated into our overall enterprise risk management program, and shares common methodologies, reporting channels and governance processes that apply across the enterprise risk management program to other legal, compliance, strategic, operational, and financial risk areas.

Our cybersecurity risk management program includes:

- risk assessments designed to help identify material cybersecurity risks to our critical systems, information, products, services, and our broader enterprise IT environment;
- an information technology team principally responsible for managing (1) our cybersecurity risk assessment processes, (2) our security controls, and (3) our response to cybersecurity incidents;
- the use of external service providers, where appropriate, to assess, test or otherwise assist with aspects of our security controls;
- cybersecurity awareness training of our employees, incident response personnel, and senior management; and
- a cybersecurity incident response plan that includes procedures for responding to cybersecurity incidents.

We have not identified cybersecurity threats that have materially affected or are reasonably likely to materially affect us, including our operations, business strategy, results of operations, or financial condition.

Cybersecurity Governance

Our Board considers cybersecurity risk as part of its risk oversight function and oversees management's implementation of our cybersecurity risk management program.

The Board receives periodic reports from management on our cybersecurity risks. In addition, management updates the Board, as necessary, regarding any material cybersecurity incidents, as well as any incidents with lesser impact potential.

Our management team, including the Chief Executive Officer and President, is responsible for assessing and managing our material risks from cybersecurity threats. The team has primary responsibility for our overall cybersecurity risk management program and supervises our retained external cybersecurity consultants.

Our management team supervises efforts to prevent, detect, mitigate, and remediate cybersecurity risks and incidents through various means, which may include briefings from information technology personnel; threat intelligence and other information obtained from governmental, public or private sources, including external consultants engaged by us; and alerts and reports produced by security tools deployed in the IT environment.

Item 2. Properties

Our corporate office, consisting of approximately 41,000 square feet of warehouse and office space, is located in Lake Forest, California. We purchased the facility in February of 2017.

On January 23, 2020, we entered into a lease agreement pursuant to which we leased approximately 32,534 square foot portion of the facility to a commercial tenant. The lease term is for 5 years and 2 months commencing on March 1, 2020. The base rent payable under the Lease Agreement is \$32,534 per month initially and is subject to periodic increases up to a maximum of approximately \$54,000 per month. The tenant will pay approximately 79% of common operating expenses.

On March 26, 2025, we entered into a new lease agreement (the "Facility Lease") for a 5 year term commencing on May 1, 2025 and expanded the leased square footage to 40,090 square feet. The base rent payable under the Facility Lease is \$51,716 per month initially and is subject to periodic increases up to a maximum of approximately \$58,000 per month. Tenant will pay approximately 98% of building operating expenses. The Facility Lease grants us or Tenant the right to terminate the Facility Lease after two and a half years into the lease term and has other customary provisions, including provisions relating to default and usage restrictions.

Item 3. Legal Proceedings

None.

Item 4. Mine Safety Disclosures

Not Applicable.

PART II**Item 5. Market for Registrant’s Common Equity, Related Shareholder Matters and Issuer Purchases of Equity Securities**

Our common stock is currently quoted on the “OTCQB Venture Marketplace” under the symbol “LQMT.” On December 31, 2025, the last reported sales price of our common stock was \$0.10 per share. As of December 31, 2025, we had 174 active record holders of our common stock.

The following table sets forth, on a per share basis, the range of high and low bid information for the shares of our common stock for each full quarterly period within the two most recent fiscal years and any subsequent interim period for which financial statements are included, as reported by the “OTCQB Venture Marketplace.” These quotations reflect inter-dealer prices, without retail mark-up, mark-down or commission and may not necessarily represent actual transactions.

	2025	High	Low
Fourth Quarter	\$	0.15	\$ 0.08
Third Quarter	\$	0.16	\$ 0.11
Second Quarter	\$	0.14	\$ 0.11
First Quarter	\$	0.13	\$ 0.04
	2024	High	Low
Fourth Quarter	\$	0.07	\$ 0.05
Third Quarter	\$	0.07	\$ 0.05
Second Quarter	\$	0.05	\$ 0.04
First Quarter	\$	0.05	\$ 0.04

We have never paid a cash dividend on our common stock. We do not anticipate paying any cash dividends on our common stock in the foreseeable future, and we plan to retain our earnings to finance our operations and future growth.

Item 6. [Reserved]**Item 7. Management’s Discussion and Analysis of Financial Condition and Results of Operations**

This management’s discussion and analysis should be read in conjunction with the consolidated financial statements and notes included elsewhere in this report on Form 10-K. All amounts described in this section are in thousands, except percentages, periods of time, and share and per share data.

This management’s discussion and analysis, as well as other sections of this report on Form 10-K, may contain “forward-looking statements” that involve risks and uncertainties, including statements regarding our plans, future events, objectives, expectations, estimates, forecasts, assumptions or projections. Any statement that is not a statement of historical fact is a forward-looking statement, and in some cases, words such as “believe,” “estimate,” “project,” “expect,” “intend,” “may,” “anticipate,” “plan,” “seek,” and similar expressions identify forward-looking statements. These statements involve risks and uncertainties that could cause actual outcomes and results to differ materially from the anticipated outcomes or results, and undue reliance should not be placed on these statements. These risks and uncertainties include, but are not limited to, the matters discussed under the caption “Risk Factors” in Item 1A of this report and other risks and uncertainties discussed in filings made with the Securities and Exchange Commission (including risks described in subsequent reports on Form 10-Q, Form 10-K, Form 8-K, and other filings). Liquidmetal Technologies, Inc. disclaims any intention or obligation to update or revise any forward-looking statements, whether as a result of new information, future events, or otherwise.

OVERVIEW

We are a materials technology and manufacturing company focused on the development and commercialization of products made from proprietary amorphous alloys and/or utilizing proprietary amorphous alloy manufacturing technologies. In addition to developing our own manufacturing facility through our subsidiary in China, we work with third-party manufacturing and commercial partners to develop and commercial products made from our proprietary amorphous alloys.

Amorphous alloys are, in general, unique materials that are distinguished by their ability to retain a random atomic structure when they solidify, in contrast to the crystalline atomic structure that forms in other metals and alloys when they solidify. Liquidmetal alloys are proprietary amorphous alloys that possess a combination of performance, processing, and potential cost advantages that we believe will make them preferable to other materials in a variety of applications. The amorphous atomic structure of bulk alloys enables them to overcome certain performance limitations caused by inherent weaknesses in crystalline atomic structures, thus facilitating performance and processing characteristics superior in many ways to those of their crystalline counterparts. We believe the alloys and the molding technologies we employ can result in components for many applications that exhibit exceptional dimensional control and repeatability that rivals precision machining, excellent corrosion resistance, brilliant surface finish, high strength, high hardness, high elastic limit, alloys that are non-magnetic, and the ability to form complex shapes common to the injection molding of plastics. All of these characteristics are achievable from the molding process, so design engineers often do not have to select specific alloys to achieve one or more of the characteristics as is the case with crystalline materials. We believe these advantages could result in Liquidmetal alloys supplanting high-performance alloys, such as titanium and stainless steel, and other incumbent materials in a wide variety of applications. Moreover, we believe these advantages could enable the introduction of entirely new products and applications that are not possible or commercially viable with other materials.

Our revenues are derived from i) selling our bulk amorphous alloy custom products and parts for applications which include, but are not limited to, non-consumer electronic devices, medical products, automotive components, and sports and leisure goods; ii) selling tooling and prototype parts such as demonstration parts and test samples for customers with products in development; and iii) product licensing and royalty revenue.

Our cost of sales consists primarily of the costs of manufacturing, which include raw alloy and direct labor costs. Selling, general, and administrative expenses currently consist primarily of salaries and related benefits, travel, consulting and professional fees, depreciation and amortization, insurance, office and administrative expenses, and other expenses related to our operations.

Research and development expenses represent salaries, related benefits expenses, consulting and contract services, expenses incurred for the design and testing of new processing methods, expenses for the development of sample and prototype products, and other expenses related to the research and development of Liquidmetal bulk alloys. Costs associated with research and development activities are expensed as incurred. We plan to enhance our competitive position by improving our existing technologies and developing advances in amorphous alloy technologies. We believe that our research and development efforts will focus on the discovery of new alloy compositions, the development of improved processing technology, and the identification of new applications for our alloys.

SIGNIFICANT TRANSACTIONS

Hangzhou Feifeng Liquidmetal Co., Ltd. Joint Venture

On July 4, 2025, Liquidmetal Asia Holdings Limited (“Liquidmetal Asia”), a Hong Kong incorporated wholly owned subsidiary, entered into a shareholders agreement with Mr. Chong Liu, an individual investor to form a new joint venture company named Hangzhou Feifeng Liquidmetal Co. Ltd., a limited liability company formed under the Peoples Republic of China (the “Joint Venture Company”). The Joint Venture Company was formed for the principal purpose of developing a manufacturing facility in Hangzhou, China for the manufacture of amorphous metal products. The Joint Venture Company will be owned 70% by Liquidmetal Asia and 30% by Mr. Liu and will be capitalized with \$6.0 million USD of initial capital, of which \$4,200 has been contributed by Liquidmetal Asia, and \$1,800 will be contributed by Mr. Liu on or before May 25, 2028. This Joint Venture Company will have full manufacturing capabilities in 2026.

Yihao Manufacturing Agreement

On January 12, 2022, Liquidmetal Technologies entered into a manufacturing agreement (“Manufacturing Agreement”) with Dongguan Yihao Metal Materials Technology Co. Ltd. (“Yihao”) to become an outsourced manufacturer of the Company’s products. Under the Manufacturing Agreement, which has a term of five years, Yihao has agreed to serve as a non-exclusive contract manufacturer for amorphous alloy parts offered and sold by the Company at prices determined on a “cost-plus” basis. Yihao is an affiliate of Dongguan Eontec Co. Ltd. and Professor Lugee Li, our Chairman and largest beneficial owner of the Company’s capital stock.

Liquidmetal Golf License

On January 13, 2022, our Liquidmetal Golf subsidiary entered into a sublicense agreement (“LMG Sublicense Agreement”) with Amorphous Technologies Japan, Inc. (“ATJ”), a newly formed Japanese entity that was established by Twins Corporation, a sporting goods company operating in Japan. Under the agreement, LMG granted to ATJ a nonexclusive worldwide sublicense to the Company’s amorphous alloy technology and related trademarks to manufacture and sell golf clubs and golf related products. The LMG Sublicense Agreement had an original term of three years and has been extended for an additional three year term that provides for the payment of a running royalty to LMG of 3% of the net sales price of licensed products.

Corporate Facility Purchase and Lease

On February 16, 2017, we purchased a 41,000 square foot facility (the “Facility”) located in Lake Forest, CA, where operations commenced during July 2017. The purchase price for the Facility was \$7,818.

On January 23, 2020, 20321 Valencia, LLC, a Delaware limited liability company and our wholly owned subsidiary, entered into a lease agreement pursuant to which we leased to MatterHackers, Inc., a Delaware corporation (“Tenant”), an approximately 32,534 square foot portion of the Facility. The lease term was for 5 years and 2 months and expired on April 30, 2025. The base rent payable under the lease was \$33 per month initially and was subject to periodic increases up to a maximum of approximately \$54 per month. Tenant paid approximately 79% of common operating expenses.

On March 26, 2025, we entered into a new lease agreement (the “Facility Lease”) for a 5 year term commencing on May 1, 2025 and expanded the leased square footage to 40,090 square feet. The base rent payable under the Facility Lease is \$52 per month initially and is subject to periodic increases up to a maximum of approximately \$58 per month. Tenant will pay approximately 98% of building operating expenses. The Facility Lease grants us or Tenant the right to terminate the Facility Lease after two and a half years into the lease term and has other customary provisions, including provisions relating to default and usage restrictions.

2016 Purchase Agreement

On March 10, 2016, we entered into a Securities Purchase Agreement (the “2016 Purchase Agreement”) with Liquidmetal Technology Limited, a Hong Kong company (the “Investor”), which is controlled by our Chairman, Professor Lugee Li (“Professor Li”). The 2016 Purchase Agreement provided for the purchase by the Investor of a total of 405,000,000 shares of our common stock for an aggregate purchase price of \$63,400. The transaction occurred in multiple closings, with the Investor having purchased 105,000,000 shares at a purchase price of \$8,400 (or \$0.08 per share) at the initial closing on March 10, 2016, and the remaining 200,000,000 shares at \$0.15 per share and 100,000,000 shares at \$0.25 per share for an aggregate purchase price of \$55,000 on October 26, 2016. On October 10, 2024, the Investor sold 179,787,888 to various buyers leaving 226,572,262 shares of our common stock owned by the Investor as of December 31, 2025.

In addition to the shares issuable under the 2016 Purchase Agreement, we issued to the Investor a warrant to acquire 10,066,809 shares of common stock. The warrant expired on March 10, 2026.

Eontec License Agreement

On March 10, 2016, in connection with the 2016 Purchase Agreement, we entered into a Parallel License Agreement (the “License Agreement”) with DongGuan Eontec Co., Ltd., a Hong Kong corporation (“Eontec”) pursuant to which we each entered into a cross-license of our respective technologies. Our Chairman, Professor Li, is also the Chairman of Eontec.

The License Agreement provides for the cross-license of certain patents, technical information, and trademarks between us and Eontec. In particular, we granted to Eontec a paid-up, royalty-free, perpetual license to our patents and related technical information to make, have made, use, offer to sell, sell, export, and import products in certain geographic areas outside of North America and Europe. In turn, Eontec granted to us a paid-up, royalty-free, perpetual license to Eontec’s patents and related technical information to make, have made, use, offer to sell, sell, export, and import products in certain geographic areas outside of specified countries in Asia. The license granted by us to Eontec is exclusive (including to the exclusion of us) in the countries of Brunei, Cambodia, China (P.R.C and R.O.C.), East Timor, Indonesia, Japan, Laos, Malaysia, Myanmar, Philippines, Singapore, South Korea, Thailand, and Vietnam. The license granted by Eontec to us is exclusive (including to the exclusion of Eontec) in North America and Europe. The cross-licenses are non-exclusive in geographic areas outside of the foregoing exclusive territories.

Apple License Transaction

On August 5, 2010, we entered into a license transaction with Apple pursuant to which (i) we contributed substantially all of our intellectual property assets to a newly organized special-purpose, wholly-owned subsidiary, Crucible Intellectual Property, LLC (“CIP”), (ii) CIP granted to Apple a perpetual, worldwide, fully-paid, exclusive license to commercialize such intellectual property in the field of consumer electronic products, as defined in the license agreement, in exchange for a license fee, and (iii) CIP granted back to us a perpetual, worldwide, fully-paid, exclusive license to commercialize such intellectual property in all other fields of use.

Under the agreements relating to the license transaction with Apple, we were obligated to contribute to CIP all intellectual property that we developed through February 2016. We are also obligated to maintain certain limited liability company formalities with respect to CIP at all times after the closing of the license transaction.

Liquidmetal Golf License

On January 13, 2022, our Liquidmetal Golf subsidiary (“Liquidmetal Golf” or “LMG”) entered into a sublicense agreement (“LMG Sublicense Agreement”) with Amorphous Technologies Japan, Inc. (“ATJ”), a newly formed Japanese entity that was established by Twins Corporation, a sporting goods company operating in Japan. Under the agreement, LMG granted ATJ a nonexclusive worldwide sublicense to our amorphous alloy technology and related trademarks to manufacture and sell golf clubs and golf related products. The original term of three years was extended to have automatic, annual renewals and provided for the payment of a running royalty to LMG of 3% of the net sales price of licensed products.

Swatch Group License

In March 2009, we entered into a license agreement with Swatch Group, Ltd. (“Swatch”) under which Swatch was granted a non-exclusive license to our technology to produce and market watches and certain other luxury products. In March 2011, this license agreement was amended to grant Swatch exclusive rights as to watches, but non-exclusive as to Apple. We will receive royalty payments over the life of the contract on all Liquidmetal products produced and sold by Swatch. The license agreement with Swatch will expire on the expiration date of the last licensed patent.

RESULTS OF OPERATIONS

	Years ended December 31,					
	2025		2024		Changes

(a) Year Ended December 31, 2025 Compared to Year Ended December 31, 2024

Revenue and operating expenses

Revenue. Total revenue decreased by \$76 to \$784 for the year ended December 31, 2025 from \$860 for the year ended December 31, 2024. The decrease was attributable to a decrease in product shipments primarily related to our health monitoring rings and medical devices.

Cost of sales. Cost of sales was \$554, or 70.7% of total revenue, for the year ended December 31, 2025, as compared to \$643, or 74.8% of total revenue, for the year ended December 31, 2024. Our cost of sales percentages have fluctuated and may continue to fluctuate based on production volumes and quoted production prices per unit and may not be representative of our future business. Once we are able to sustain and increase shipments of routine, commercial products and parts through our contract manufacturers, we expect our cost of sales percentages to decrease, stabilize, and be more predictable.

Gross profit. Our gross profit increased by \$13 from \$217 for the year ended December 31, 2024 to \$230 for the year ended December 31, 2025. Our gross margin percentage increased from 25.2% for the year ended December 31, 2024 to 29.3% for the year ended December 31, 2025. Our gross profit percentages have fluctuated and may continue to fluctuate based on production volumes and quoted production prices per unit and may not be representative of our future business. Once we are able to sustain and increase shipments of routine, commercial products and parts through future orders to third party contract manufacturers, we expect our gross profit percentages to stabilize, increase, and be more predictable.

Selling, marketing, general, and administrative expenses. Selling, marketing, general, and administrative expenses increased by \$447 to \$3,958, or 504.8% of revenue, for the year ended December 31, 2025 from \$3,511, or 408.3% of revenue, for the year ended December 31, 2024. The increase in expenses was primarily attributable to increase in travel, legal expenses, and joint venture startup costs in 2025 compared to 2024.

Research and development expenses. Research and development expenses decreased by \$5 to \$14, or 1.8% of revenue, for the year ended December 31, 2025, from \$19, or 2.2% of revenue, for the year ended December 31, 2024. The decrease in expense was mainly due to reductions in employee compensation and associated development initiatives from headcount reductions. Going forward, we will continue to perform research and development of new Liquidmetal alloys and related processing capabilities, albeit on a reduced basis.

Operating loss. Operating loss increased by \$429 from \$3,313 for the year ended December 31, 2024 to \$3,742 for the year ended December 31, 2025. Fluctuations in our operating loss are primarily attributable to variations in operating expenses, as discussed above.

We continue to invest in our technology infrastructure to expedite the adoption of our technology, but we have experienced long sales lead times for customer adoption of our technology. Until that time when we can either (i) increase our revenues with shipments of routine, commercial products and parts through third party contract manufacturers or (ii) obtain significant licensing revenues, we expect to continue to have operating losses for the foreseeable future.

Non-operational income and expenses

Investment income. Investment income relates to realized gains earned from our investments in debt securities for the respective periods. Investment income was \$102 and \$266 for the years ended December 31, 2025 and 2024, respectively. The decrease during 2025 is primarily due to lower overall trading on debt securities as a result of withdrawals from debt securities to fund our new joint venture.

Interest income. Interest income relates to interest earned from our cash deposits and investments in debt securities for the respective periods. Interest income was \$649 and \$870 for the years ended December 31, 2025 and 2024, respectively. The decrease during 2025 is primarily due to lower overall yields on debt securities as a result of withdrawals from debt securities to fund our new joint venture.

Lease income. Lease income relates to straight-line rental income received under the Facility Lease. Such amounts were \$641 and \$355 for the years ended December 31, 2025 and 2024, respectively.

Net loss. Our annual net losses of \$2,342 for the year ended December 31, 2025 and \$1,511 for the year ended December 31, 2024 are primarily reflective of operating expenses associated with our on-going business as well as non-operational income, discussed above.

LIQUIDITY AND CAPITAL RESOURCES**Cash used in operating activities**

Cash used in operating activities totaled \$2,752 for the year ended December 31, 2025 and \$1,157 for the year ended December 31, 2024. The cash was primarily used to fund operating and capital expenses related to our new joint venture manufacturing operations as well as business and product development efforts.

Cash provided by (used in) investing activities

Cash provided by investing activities totaled \$3,905 for the year ended December 31, 2025 and cash used in investing activities totaled \$1,674 for the year ended December 31, 2024. Cash used in investing activities primarily consists of purchases and sales of debt securities in line with our investment strategy.

Financing arrangements and outlook

The Company has a relatively limited history of selling bulk amorphous alloy products and components on a mass-production scale. Furthermore, the ability of contract manufacturers to produce the Company's products in desired quantities and at commercially reasonable prices is uncertain and is dependent on a variety of factors that are outside of the Company's control, including the nature and design of the component, the customer's specifications, and required delivery timelines. These factors have previously required that the Company engage in equity sales under various stock purchase agreements to support its operations and strategic initiatives.

However, as of December 31, 2025, the Company had \$7,164 in cash, as well as \$12,523 in investments in debt securities. The Company views this total of \$19,760 as readily available sources of liquidity in the event needed to advance the Company's existing strategy, and/or pursue an alternative strategy. As such, the Company anticipates that its current capital resources, when considering expected losses from operations, will be sufficient to fund the Company's operations for the foreseeable future.

OFF-BALANCE SHEET ARRANGEMENTS

An off-balance sheet arrangement is any transaction, agreement or other contractual arrangement involving an unconsolidated entity under which a company has (1) made guarantees, (2) a retained or a contingent interest in transferred assets, (3) an obligation under derivative instruments classified as equity, or (4) any obligation arising out of a material variable interest in an unconsolidated entity that provides financing, liquidity, market risk or credit risk support to our Company, or that engages in leasing, hedging, or research and development arrangements with our Company. As of December 31, 2025, the Company did not have any off-balance sheet arrangements.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires us to make estimates and assumptions that affect reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates and assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. Actual results could differ materially from these estimates under different assumptions or conditions.

We believe that the following accounting policies are the most critical to our consolidated financial statements since these policies require significant judgment or involve complex estimates that are important to the portrayal of our financial condition and operating results:

- We recognize revenue pursuant to applicable accounting standards including FASB ASC Topic 606 ("ASC 606"), Revenue from Contracts with Customers. ASC 606 summarizes certain points in applying generally accepted accounting principles to revenue recognition in financial statements and provides guidance on revenue recognition issues in the absence of authoritative literature addressing a specific arrangement or a specific industry.

Our revenue recognition policy complies with the requirements of ASC 606. As a majority of our sales revenue continues to be recognized when products are shipped, and there was no change in the recognition model historically applied to active license and royalty contracts under the new revenue standard, there was no adjustment to the opening balance of retained earnings. The impact to our results of operations is not material, on an on-going basis, because the analysis of our contracts under the new revenue standard supports a recognition model consistent with our previous revenue recognition model. Revenue on the majority of our contracts will continue to be recognized over time because of the continuous transfer of control to the customer.

- **Products Revenue:** Product revenues are primarily generated from the sale and prototyping of molds and bulk alloy products. Revenue is recognized when i) persuasive evidence of an arrangement exists, ii) delivery has occurred, iii) the sales price is fixed or determinable, iv) collection is probable and v) all obligations have been substantially performed pursuant to the terms of the arrangement. When we receive consideration, or such consideration is unconditionally due, from a customer prior to transferring goods or services to the customer under the terms of a sales contract, we record deferred revenue, which represents a contract liability. We will recognize deferred revenue as products revenue after it has transferred control of the goods or services to the customer and all revenue recognition criteria are met. Such amounts are not expected to be material on an ongoing basis.
- **Licensing and royalties:** License revenue arrangements in general provide for the grant of an exclusive or non-exclusive right to manufacture and/or sell products covered by patented technologies owned or controlled by us. The intellectual property rights granted may be perpetual in nature, extending until the expiration of the related patents, or can be granted for a defined period of time. Licensing revenues that are one-time fees upon the granting of the license are recognized when i) the license term begins in a manner consistent with the nature of the transaction and the earnings process is complete, ii) when collectability is reasonably assured or upon receipt of an upfront fee, and iii) when all other revenue recognition criteria have been met. Pursuant to the terms of these agreements, we have no further obligation with respect to the grant of the license. Licensing revenues that are related to royalties are recognized as the royalties are earned over the related period.

- **Practical Expedients and Exemptions:** We generally expense sales commissions when incurred because the amortization period would have been one year or less. These costs are recorded within selling, marketing, general and administrative expenses. We do not disclose the value of unsatisfied performance obligations for (i) contracts with an original expected length of one year or less and (ii) contracts for which we recognize revenue at the amount for which it has the right to invoice for services performed.
- We value our long-lived assets at the lower of cost or fair market value. We review long-lived assets to be held and used in operations for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may be impaired. These evaluations may result from significant decreases in the overall market outlook for our technology or the market price of an asset, a significant adverse change in the extent or manner in which an asset is being used in its physical condition, a significant adverse change in legal factors or in the business climate that could affect the value of an asset, as well as economic or operational analyses. If we concludes that the carrying value of certain assets will not be recovered based on expected undiscounted future cash flows, an impairment write-down is recorded to reduce the assets to their estimated fair value. Fair value is determined via market, cost and income based valuation techniques, as appropriate. The fair value is measured on a nonrecurring basis using a combination of quoted prices for similar assets in active markets and other unobservable adjustments to historical cost (Level 3) inputs. No cash impairment charges were recorded for the years ended December 31, 2025 and December 31, 2024.
- We record valuation allowances to reduce our deferred tax assets to the amounts deemed more likely than not of being realized. While we consider taxable income in assessing the need for a valuation allowance, in the event we determine we would be able to realize our deferred tax assets in the future in excess of the net recorded amount, an adjustment would be made and income increased in the period of such determination. Likewise, in the event we determine we would not be able to realize all or part of our deferred tax assets in the future, an adjustment would be made and charged to income in the period of such determination.
- We account for share-based compensation in accordance with the fair value recognition provisions of FASB ASC Topic 718, *Share-based Payment*, which requires all share-based payments to employees, including grants of employee stock options, to be recognized in the consolidated financial statements based on their fair values. The fair value of stock options is calculated by using the Black-Scholes option pricing formula that requires estimates for expected volatility, expected dividends, the risk-free interest rate and the term of the option. If any of the assumptions used in the Black-Scholes model change significantly, share-based compensation expense may differ materially in the future from that recorded in the current period.
- Our inventory is stated at the lower of cost or estimated net realizable value. The cost of inventories is determined on the basis of weighted-average cost. We perform an analysis of our inventory balances at least quarterly to determine if the carrying amount of inventories exceeds their net realizable value. The analysis of estimated net realizable value is based on customer orders, market trends and historical pricing. If the carrying amount exceeds the estimated net realizable value, the carrying amount is reduced to the estimated net realizable value.
- We invest excess funds in debt securities to maximize investment yield, while maintaining liquidity and minimizing credit risk. Debt securities are carried at fair value and consist primarily of investments in obligations of the United States Treasury, various U.S. and foreign corporations, and certificates of deposits. We classify our investments in debt securities as available-for-sale with all unrealized gains or losses included as part of other comprehensive income. We evaluate our debt securities with unrealized losses on a quarterly basis for potential other-than-temporary impairments in value. As a result of these assessments, we did not recognize any other-than-temporary impairment losses considered to be credit related for the years ended December 31, 2025 and 2024.

RECENT ACCOUNTING PRONOUNCEMENTS

Financial Instruments- Credit Losses

In June 2016, the FASB issued an accounting standards update which changes the methodology for measuring credit losses on financial instruments and the timing of when such losses are recorded. This update replaces the existing incurred loss impairment model with an expected loss model (referred to as the Current Expected Credit Loss model, or "CECL"). The standard update, and its related amendments, will become effective for the fiscal year beginning on January 1, 2023. The Company is in the process of assessing the impact of this standard update, and its related amendments, on its consolidated financial statements, but is not expecting it will have a material impact on the Company's consolidated financial statements.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the AICPA and the SEC did not or are not believed by management to have a material impact on the Company's present or future consolidated financial statements.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

None.

Item 8. Financial Statements

The financial statements required by this item can be found beginning on page 45 of this Annual Report on Form 10-K.

Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosures

Not applicable.

Item 9A. Controls and Procedures

Evaluation of Disclosure Controls and Procedures. Under the supervision and with the participation of our management, including our Chief Executive Officer (Principal Executive/Financial Officer), we conducted an evaluation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15(d)-15(e) under the Securities Exchange Act of 1934, as amended (the “Exchange Act”)). Based on this evaluation, our Chief Executive Officer (Principal Executive/Financial Officer) concluded that our disclosure controls and procedures were effective as of December 31, 2025 (the end of the period covered by this report).

Changes in Internal Controls. There were no changes in our internal control over financial reporting (as that term is defined in Rules 13a-15(f) or 15d-15(f) under the Exchange Act) during the year ended December 31, 2025 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Management’s Report on Internal Control over Financial Reporting. The Company’s management is responsible for establishing and maintaining adequate internal control over financial reporting for the Company. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States and includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the Company’s assets, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States, and that the Company’s receipts and expenditures are being made only in accordance with authorizations of the Company’s management and directors, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company’s assets that could have a material effect on the financial statements.

As required by Section 404 of the Sarbanes-Oxley Act of 2002 and the related rule of the SEC, management assessed the effectiveness of the Company’s internal control over financial reporting using the *Internal Control-Integrated Framework (2013)* developed by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on this assessment, management concluded that the company’s internal control over financial reporting was effective as of December 31, 2025. Management has not identified any material weaknesses in the Company’s internal control over financial reporting as of December 31, 2025.

Item 9B. Other Information

During the three months ended December 31, 2025, none of the Company’s directors or officers adopted, modified or terminated a Rule 10b5-1 trading arrangement or a non-Rule 10b5-1 trading arrangement (each as defined in Item 408 of Regulation S-K under the Exchange Act).

Item 9C. Disclosure Regarding Foreign Jurisdictions that Prevent Inspections

Not applicable.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

Set forth below is a table identifying our directors and executive officers as of December 31, 2025:

Name	Age	Position
Lugee Li	66	Chairman of the Board
Tony Chung	56	Chief Executive Officer, Director
Isaac Bresnick	40	President, Director
Vincent Carrubba	67	Director

Professor Lugee Li (“*Professor Li*”) was elected by our board of directors to serve as our Chief Executive Officer in December 2016 and continued to serve in that capacity through July 2021. Pursuant to the terms of the 2016 Purchase Agreement, Professor Li was appointed as a member of our board of directors in March 2016 and became Chairman of our board of directors in October 2016. Professor Li is the founder, Chairman, and shareholder of DongGuan Eontec Co. Ltd. (“Eontec”), a Hong Kong company listed on the Shenzhen Stock Exchange engaged in the production of precision die-cast products and the research and development of new materials. Professor Li founded Eontec in 1993 and has served as its Chairman since that date. At Eontec, Professor Li is responsible for strategic development and research and development. Professor Li is also the founder and sole shareholder of Leader Biomedical Limited, a Hong Kong company engaged in the supply of biomaterials and surgical implants. Professor Li serves as an analyst for the Institute of Metal Research at the Chinese Academy of Sciences and serves part-time as a professor at several universities in China. Professor Li owns Liquidmetal Technology Limited, a Hong Kong company and the Investor in our 2016 Purchase Agreement. Due to his decades of experience in our industry, as well as his academic credentials, we believe Professor Li is qualified to serve as one of our directors.

Tony Chung was appointed as the Company’s Chief Executive Officer on July 6, 2021 and has served as a Director since August 2017. Mr. Chung had previously served as the Company’s Chief Financial Officer from December 2008 to August 2017. Prior to re-joining the Company as an executive, he was the Chief Financial Officer of Solarcity, currently a division of Tesla Inc., that provides advanced solar technology solutions. Mr. Chung also served as the Managing Director of Baypoint Ventures, a technology investment fund. Mr. Chung is an Attorney and received a B.S. degree in business from UC Berkeley and a J.D. Degree from PCU Law School. We believe that Mr. Chung’s business and financial experience, including within the technology industry and the Company specifically, qualifies him to serve as one of our directors.

Isaac Bresnick began serving as a Director in October 2016 and was appointed to the role of President on July 6, 2021. Prior to being appointed as President, he was the Executive Administrator of the Company since November 2016. From October 2014 to November 2016, Mr. Bresnick served as Legal and Regulatory Affairs Director for the Leader Biomedical Group, a private company based in Hong Kong and operating from Amsterdam, the Netherlands. At Leader Biomedical, Mr. Bresnick was responsible for the direction and management of legal affairs, regulatory affairs, quality control and quality assurance, as well as for advising executive management of affiliated companies. From July 2013 to October 2017, Mr. Bresnick served as Director of aap Joints GmbH, a private company in Berlin, Germany. From January 2013 through June 2013, Mr. Bresnick provided full-time consulting services to AAP Orthopedics Ltd., a BVI company. Mr. Bresnick is an Attorney and received his J.D. from the University of Connecticut School of Law in 2013, and his B.S. in Industrial Design from the University of Bridgeport in 2008. After completion of his undergraduate studies and continuing through his enrollment at the University of Connecticut, Mr. Bresnick worked as Senior Arrangements Designer for Electric Boat Corporation, a subsidiary of General Dynamics, from June 2008 to December 2012. Due to his executive management experience, we believe Mr. Bresnick is qualified to serve as one of our directors.

Vincent Carrubba began serving on our board of directors in October 2016. From September 2014 through the present, Mr. Carrubba has served as the CEO of Admiral Composite Technologies Inc. (“Admiral”). During his time at Admiral, Mr. Carrubba has helped to develop new technologies for environmentally responsible and innovative building materials which represent Admiral’s product lines. Mr. Carrubba has also served as Admiral’s Chairman since its inception in 2009. From September 2014 through the present, Mr. Carrubba has served as the CEO of Asia Sourcing & Communications USA Inc. and he has served as its Chairman since its inception in 2013. From 2002 through August 2014, Mr. Carrubba served as the Director of research and development for Interdynamics Inc. and IDQ Holdings, where he was responsible for all research and development and quality control matters, including the management of engineering, legal, patenting, regulatory, insurance and consumer relations matters. From 1989 through 1992, Mr. Carrubba designed and installed the New York Stock Exchange telecommunications and information technology systems. Mr. Carrubba has held engineering and executive positions with Xerox, General Electric, Bristol-Meyers Squibb and AT&T and he is the inventor of several patents related to telecommunications, professional tools and consumer products. Mr. Carrubba received a Bachelor of Arts degree in Engineering Science and a Bachelor of Science Degree in Mechanical Engineering from Columbia University’s School of Engineering and Applied Science (SEAS) in 1982. We believe Mr. Carrubba is qualified to serve as one of our directors because of his extensive experience in the technology industry, including his experience with major telecommunications companies.

Delinquent Section 16(a) Reports

Section 16(a) of Exchange Act requires the Company’s directors and officers, and persons who own more than 10% of a registered class of the Company’s equity securities, to file initial reports of ownership and reports of changes in ownership with the SEC. Such persons also are required to furnish the Company with copies of all Section 16(a) reports they file.

Based solely on its review of the copies of such reports received by it with respect to fiscal year 2025 or written representations from certain reporting persons, the Company believes that all filing requirements applicable to its directors and officers and persons who own more than 10% of a registered class of the Company’s equity securities have been complied with, on a timely basis, for fiscal year 2025.

Code of Ethics

Our board of directors has adopted a written Code of Ethics for Chief Executive Officer and Senior Financial and Accounting Officers that applies to our Principal Executive Officer, Principal Financial Officer, Principal Accounting Officer or Controller, or persons performing similar functions. A current copy of the code is filed as an exhibit to this report on Form 10-K and is also available on our website, www.liquidmetal.com, in the “Investors” section. In addition, we intend to post on our website, www.liquidmetal.com, all disclosures that are required by law concerning any amendments to, or waivers from, any provision of the Code of Ethics for Chief Executive Officer and Senior Financial and Accounting Officers.

Insider Trading Policy

The Company has adopted an insider trading policy that governs the purchase, sale, and/or other transactions of our securities by our directors, officers and employees and the Company itself that is reasonably designed to promote compliance with insider trading laws, rules and regulations and any applicable listing standards. A copy of our insider trading policy is filed as Exhibit 19.1 to this Annual Report on Form 10-K for the fiscal year ended December 31, 2025.

Item 11. Executive Compensation**Executive Benefits and Perquisites**

Set forth below is information regarding compensation earned by or paid or awarded to the following executive officers of the Company during the year ended December 31, 2025: (i) Tony Chung, our Chief Executive Officer and Principal Financial Officer, and (ii) Isaac Bresnick, our President. These persons are hereafter referred to as our “named executive officers.” The identification of such named executive officers is determined based on the individual’s total compensation for the year ended December 31, 2025, as reported below in the Summary Compensation Table.

Summary Compensation Table

The following table sets forth for each of the named executive officers: (i) the dollar value of base salary and bonus earned during the years ended December 31, 2025 and 2024 (ii) the aggregate grant date fair value of stock and option awards granted during 2025 and 2024, computed in accordance with Financial Accounting Standards Board (“FASB”) Accounting Standards Codification (“ASC”) Topic 718 (R); (iii) the dollar value of earnings for services pursuant to awards granted during 2025 and 2024 under non-equity incentive plans; (iv) non-qualified deferred compensation earnings during 2025 and 2024; (v) all other compensation for 2025 and 2024; and, finally, (vi) the dollar value of total compensation for 2025 and 2024.

Name and Principal Position	Year	Salary	Severance	Bonus	Stock Awards	Option Awards	Total
Tony Chung, <i>Chief Executive Officer and Chief Financial Officer</i>	2025	\$ 300,779	\$ -	\$ -	\$ -	\$ 17,448	\$ 318,227
	2024	\$ 266,931	\$ -	\$ -	\$ -	\$ 134,692	\$ 401,623
Isaac Bresnick, <i>President and Former Executive Administrator</i>	2025	\$ 220,779	\$ -	\$ -	\$ -	\$ 17,448	\$ 238,227
	2024	\$ 195,388	\$ -	\$ -	\$ -	\$ 67,346	\$ 262,734
Lugee Li, <i>Chairman</i>	2025	\$ 152,446	\$ -	\$ -	\$ -	\$ -	\$ 152,446
	2024	\$ -	\$ -	\$ -	\$ -	\$ -	\$ -

Outstanding Equity Awards at 2025 Fiscal Year-End

The following table sets forth information on outstanding option and stock awards held by the named executive officers at December 31, 2025, including the number of shares underlying both exercisable and un-exercisable portions of each stock option as well as the exercise price and expiration date of each outstanding option.

Name	Option Awards				
	Number of Securities Underlying Unexercised Options Exercisable	Number of Securities Underlying Unexercised Options Unexercisable	Equity Incentive Plan Awards: Number of Securities Underlying Unexercised Unearned Options	Option Exercise Price	Option Expiration Date
Tony Chung	75,000	-	-	\$ 0.38	10/17/2027
	240,000	-	-	\$ 0.14	11/14/2028
	7,500,000 (1)	-	-	\$ 0.07	07/06/2031
	2,333,250	-	1,666,750 (2)	\$ 0.05	03/12/2034
	-	-	3,000,000 (4)	\$ 0.04	03/12/2035
Isaac Bresnick	700,000	-	-	\$ 0.25	12/13/2026
	240,000	-	-	\$ 0.23	02/07/2027
	900,000	-	-	\$ 0.09	12/14/2031
	1,166,625	-	833,375 (3)	\$ 0.05	03/12/2034
	-	-	3,000,000 (5)	\$ 0.04	03/12/2035

- (1) The shares underlying these grants are subject to a combination of market-price based and time-based lock-up provisions.
- (2) The shares underlying these grants vest 33% following the first anniversary of the grant date of March 12, 2024, and on a monthly basis following such date for the remaining two years thereof.
- (3) The shares underlying these grants vest 33% following the first anniversary of the grant date of March 12, 2024, and on a monthly basis following such date for the remaining two years thereof.
- (4) The shares underlying these grants vest 33% following the first anniversary of the grant date of March 12, 2025, and on a monthly basis following such date for the remaining two years thereof.
- (5) The shares underlying these grants vest 33% following the first anniversary of the grant date of March 12, 2025, and on a monthly basis following such date for the remaining two years thereof.

Employment Agreements and Change of Control Agreement

On March 12, 2024 we entered into Change of Control Agreements with Mr. Tony Chung and Mr. Isaac Bresnick, each of whom serves as our executive officer. Pursuant to these agreements, if a change of control of the Company occurs and, within one year following such change of control, the executive's employment is terminated by us other than for cause or the executive resigns for good reason, the executive will be entitled to receive a lump-sum cash severance payment equal to twelve months of his then-current base salary. In addition, all unvested equity awards held by the executive will immediately vest upon a change of control, and stock options will remain exercisable for a specified period following termination. The agreements also provide for continued health and welfare benefits for up to one year following a qualifying termination. A copy of our Change of Control Agreements is filed as Exhibit 19.2 to this Annual Report on Form 10-K for the fiscal year ended December 31, 2025.

401(k) Savings Plan

We have adopted a tax-qualified employee savings and retirement plan, or 401(k) plan that covers all of our employees. Pursuant to our 401(k) plan, participants may elect to reduce their current compensation, on a pre-tax basis, by an amount up to the statutorily prescribed annual limit and have the amount of the reduction contributed to the 401(k) plan. The 401(k) plan permits us, in our sole discretion, to make additional employer contributions to the 401(k) plan. However, we do not currently make employer contributions to the 401(k) plan and may not do so in the future. As such, contributions by employees or by us to the 401(k) plan, and the income earned on plan contributions, are not taxable to employees until withdrawn from the 401(k) plan, and we can deduct our contributions, if any, at the time they are made.

Director Compensation

The following table sets forth information regarding the compensation received by each of our non-employee directors serving during the year ended December 31, 2025:

Name	Fees Earned or Paid in Cash (\$)	Stock Awards(\$)	Option Awards (\$)	Non-Equity Incentive Plan Compensation (\$)	Nonqualified Deferred Compensation Earnings (\$)	All Other Compensation (\$)	Total (\$)
Lugee Li	\$ -	-	\$ 10,894	-	-	-	\$ 10,894
Vincent Carrubba	\$ 40,000	-	\$ 8,724	-	-	-	\$ 48,724

Our non-employee directors receive certain compensation for their services and are reimbursed for expenses incurred in attending board and committee meetings, as determined by the board of directors. Mr. Carrubba received a base fee of \$40,000 during 2025.

We have a 2015 Equity Incentive Plan pursuant to which our non-employee directors may receive stock options. Each non-employee director may be entitled to receive options on a case by case basis, in an amount determined by our board of directors or its compensation committee in its respective discretion, to purchase shares of common stock upon initial election to the board of directors. In determining the number of options granted to a director upon initial election, the compensation committee uses its judgment and, consistent with our compensation objectives, maintains the flexibility necessary to recruit qualified and experienced directors. All options granted under the plan have an exercise price equal to the fair market value of our common stock on the date of the grant. These stock options have a 10-year term and are exercisable pursuant to an equal 3-year vesting schedule, and remain exercisable for certain periods of time after a person is no longer a director.

No director who is an employee will receive separate compensation for services rendered as a director. However, our employee directors are eligible to participate in our 2012 and 2015 Equity Incentive Plans.

We generally grant annual equity-based awards during the first half of our fiscal year, although such timing may change from year to year. The board of directors also may consider and approve interim or mid-year grants, or grants made on another basis, from time to time based on business needs, changing compensation practices or other factors, in the discretion of the board of directors. Our board of directors does not take material non-public information into account when determining the timing and terms of equity awards, and we have not timed the release of material nonpublic information for the purpose of affecting the value of executive compensation.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters

The following table sets forth certain information regarding the beneficial ownership of our common stock as of December 31, 2025 by:

- each person known by us to be a beneficial owner of more than 5.0% of our outstanding common stock;
- each of our directors;
- each of our named executive officers; and
- all of our directors and executive officers as a group.

The number and percentage of shares beneficially owned is determined under the rules of the SEC and is not necessarily indicative of beneficial ownership for any other purpose. Under such rules, beneficial ownership for each individual includes any shares as to which the individual has sole or shared voting power or investment power and also any shares which the individual has the right to acquire beneficial ownership of within 60 days of December 31, 2025 through the exercise of any stock option or other right. Unless otherwise indicated in the footnotes, each person has sole voting and investment power with respect to the shares shown as beneficially owned.

A total of 917,285,149 shares of our common stock were issued and outstanding as of December 31, 2025. Unless otherwise indicated, the address of all directors and named executive officers is 20321 Valencia Circle, Lake Forest, California 92630.

Name of Beneficial Owner	Common Stock	
	Number of Shares(1)	Percent of Class(1)
Directors and Named Executive Officers		
Lugee Li	227,472,262 (2)	24.8%
Vincent Carrubba	2,045,537 (3)	0.2%
Tony Chung	11,394,833 (4)	1.2%
Isaac Bresnick	3,117,741 (5)	0.3%
All directors and executive officers as a group (4 persons)	244,030,373	26.1%
5% Shareholders		
Liquidmetal Technology Limited	225,212,112 (6)	24.6%
Room 906, Tai Tung Building, 8 Fleming Rd		
Wanchai, Hong Kong		

*Less than one percent

- (1) Shares of common stock beneficially owned and the respective percentages of beneficial ownership of common stock assumes the exercise or conversion of all options, warrants and other securities convertible into common stock, beneficially owned by such person or entity currently exercisable or exercisable within 60 days of December 31, 2025. Shares issuable pursuant to the exercise of stock options and warrants exercisable within 60 days of December 31, 2025, or securities convertible into common stock within 60 days of December 31, 2025, are deemed outstanding and held by the holder of such shares of common stock, options, warrants, or other convertible securities, for purposes of computing the percentage of outstanding common stock beneficially owned by such person, but are not deemed outstanding for computing the percentage of outstanding common stock beneficially owned by any other person. The percentage of common stock beneficially owned is based on 917,285,149 shares of common stock outstanding as of December 31, 2025.
- (2) Includes:
 - (a) 225,212,112 shares of common stock held of record by Liquidmetal Technology Limited. Professor Li is the majority owner, officer, and director of Liquidmetal Technology Limited and has the power to direct the voting and disposition of such shares;
 - (b) 1,360,150 shares of common stock held of record by Professor Li; and
 - (c) 900,000 shares issuable pursuant to outstanding stock options which are exercisable currently or within 60 days of December 31, 2025. Does not include 3,000,000 shares that are issuable pursuant to outstanding stock options that are not exercisable currently or within 60 days of December 31, 2025.
- (3) Includes 2,045,537 shares issuable pursuant to outstanding stock options, held of record by Mr. Carrubba, which are exercisable currently or within 60 days of December 31, 2025. Does not include 1,861,130 shares that are issuable pursuant to outstanding stock options that are not exercisable currently or within 60 days of December 31, 2025.
- (4) Includes:
 - (a) 1,024,350 shares of common stock held of record by Mr. Chung; and
 - (b) 10,370,483 shares issuable pursuant to outstanding stock options which are exercisable currently or within 60 days of December 31, 2025. Does not include 4,444,517 shares that are issuable pursuant to outstanding stock options that are not exercisable currently or within 60 days of December 31, 2025.
- (5) Includes 3,117,741 shares issuable pursuant to outstanding stock options, held of record by Mr. Bresnick, which are exercisable currently or within 60 days of December 31, 2025. Does not include 3,722,259 shares that are issuable pursuant to outstanding stock options that are not exercisable currently or within 60 days of December 31, 2025.
- (6) Includes 225,212,112 shares of common stock held of record by Liquidmetal Technology Limited.

Equity Compensation Plan Information

Our executive officers, directors, and all of our employees are allowed to participate in our equity incentive plans. We believe that providing them with the ability to participate in such plans provides them with a further incentive towards ensuring our success and accomplishing our corporate goals.

The following table provides information regarding the securities authorized for issuance under our equity compensation plans as of December 31, 2025:

Plan Category	Number of securities to be issued upon exercise of outstanding options, warrants, and rights [a]	Weighted-average exercise price of outstanding options, warrants, and rights [b]	Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column [a]) [c]
Equity compensation plans approved by stockholders	25,294,167	\$ 0.09	-

The number of securities, and types of plans available for future issuances of stock options, as of December 31, 2025 was as follows:

Plan Name	Options and Warrants for Common Shares			
	Authorized	Exercised	Outstanding	Available
2012 Equity Incentive Plan	30,000,000	11,227,445	2,432,500	-
2015 Equity Incentive Plan	40,000,000	11,822,131	22,861,667	-
Total Stock Options	70,000,000	23,049,576	25,294,167	-

2012 Equity Incentive Plan

On June 28, 2012, the Company adopted the 2012 Equity Incentive Plan (“2012 Plan”), with the approval of the shareholders, which provided for the grant of stock options to officers, employees, consultants and directors of the Company and its subsidiaries. The 2012 Plan expired in June 2022.

There were 2,432,500 outstanding options or stock awards at a weighted average price of \$0.14 under the 2012 Plan as of December 31, 2025. There were 2,432,500 options exercisable and 11,227,445 shares had been issued upon exercise of options under the 2012 Plan as of December 31, 2025.

2015 Equity Incentive Plan

On January 27, 2015, the Company adopted the 2015 Equity Incentive Plan (“2015 Plan”), which provided for the grant of stock options to officers, employees, consultants and directors of the Company and its subsidiaries. The purpose of the 2015 Plan is to advance the interests of our shareholders by enhancing our ability to attract, retain, and motivate persons who make or are expected to make important contributions to the Company and its subsidiaries by providing such persons with equity ownership opportunities and performance-based incentives, thereby better aligning their interests with those of our shareholders.

The 2015 Plan provides for the granting to employees and consultants of non-statutory stock options. In addition, it permits the granting of stock appreciation rights, or SARs, with or independently of options, as well as stock bonuses and rights to purchase restricted stock. A total of 40 million shares of our common stock may be granted under the 2015 Plan, and all options granted under this plan had exercise prices that were equal to the fair market value on the date of grant. The 2015 Plan expired in January 2025.

There were 22,861,667 outstanding options or stock awards at a weighted average price of \$0.08 under the 2015 Plan as of December 31, 2025. There were 19,036,478 options exercisable and 11,822,131 shares had been issued upon exercise of options under the 2015 Plan as of December 31, 2025.

Item 13. Certain Relationships and Related Transactions, and Director Independence**Transactions with Related Persons**

On March 10, 2016, the Company entered into the 2016 Purchase Agreement with Liquidmetal Technology Limited, providing for the purchase of 405,000,000 shares of the Company's common stock for an aggregate purchase price of \$63,400. Liquidmetal Technology Limited was a newly formed company owned by Professor Li. In connection with the 2016 Purchase Agreement and also on March 10, 2016, the Company and Eontec, entered into a license agreement pursuant to which the Company and Eontec entered into a cross-license of their respective technologies. Eontec is a publicly held Hong Kong corporation of which Professor Li is the Chairman. Eontec is also an affiliate of Yihao. Yihao is currently the Company's primary contract manufacturer. As of December 31, 2025, Professor Li is a greater-than 5% beneficial owner of the Company and serves as the Company's Chairman. Equipment and services procured from Eontec, and their affiliates, were \$439 and \$612 during the years ended December 31, 2025 and 2024, respectively.

Review, Approval or Ratification of Transactions with Related Persons

Our policy is to require that any transaction with a related party required to be reported under applicable SEC rules, other than compensation-related matters, be reviewed and approved or ratified by the board of directors. The board of directors has not adopted specific procedures for review of, or standards for approval of, these transactions, but instead reviews such transactions on a case by case basis. Our policy is to require that all compensation-related matters be recommended for board of director approval. During the last fiscal year no transactions with a related party occurred that required a waiver of this policy and no transactions with a related party occurred in which we did not follow this policy.

Director Independence

Our board of directors currently has four members – Lugee Li, Isaac Bresnick, Vincent Carrubba, and Tony Chung. Our board of directors has determined that Mr. Carrubba is an "independent director" as such term is defined by the rules of the NASDAQ Stock Market, Inc.

Item 14. Principal Accountant Fees and Services**Audit Fees for 2025 and 2024**

The following table summarizes the aggregate fees billed to us by BCRG Group, our current auditor, for professional services during the years ended December 31, 2025 and December 31, 2024:

Fees	2025	2024
Audit Fees (1) - Reaudit	\$ 89,000	\$ 16,000
All Other Fees	-	-
Total Fees	\$ 89,000	\$ 16,000

The following table summarizes the aggregate fees billed to us by M&K, our previous auditor, for professional services during the year ended December 31, 2024:

Fees	2024
Audit Fees (1)	\$ 96,500
All Other Fees	-
Total Fees	\$ 96,500

(1) *Audit Fees.*

Fees for audit services billed in 2025 and 2024 consisted of:

- Progress billings for the audits of the Company's financial statements; and
- Review of the Company's quarterly financial statements.

Board of Director Pre-Approval Policies

Our board of directors pre-approves all audit and permissible non-audit services provided by our independent public accountants on a case-by-case basis. Our board of directors approved 100% of the services performed by BCRG Group for 2025 and 2024.

Report of Independent Registered Public Accounting Firm

To the shareholders and the board of directors of Liquidmetal Technologies, Inc.:

Opinion on the Consolidated Financial Statements

We have audited the accompanying consolidated balance sheet of Liquidmetal Technologies, Inc. and Subsidiaries (the "Company") as of December 31, 2025 and 2024, the related consolidated statements of operations and comprehensive income (loss), shareholders' equity, and cash flow for the year ended December 31, 2025, and the related notes (collectively referred to as the "consolidated financial statements"). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2025 and 2024, and the results of its operations and its cash flow for the year ended December 31, 2025 and 2024, in conformity with accounting principles generally accepted in the United States.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on the Company's consolidated financial statements based on our audit. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) ("PCAOB") and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. As part of our audits, we are required to obtain an understanding of internal control over financial reporting but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

Critical Audit Matters

Critical audit matters are matters arising from the current period audit of the consolidated financial statements that were communicated or are required to be communicated to the audit committee and that: (1) relate to accounts or disclosures that are material to the consolidated financial statements and (2) involved especially challenging, subjective, or complex judgments. The communication of critical audit matters does not alter in any way our opinion on the financial statements, taken as a whole, and we are not, by communicating the critical audit matter below, providing separate opinions on the critical audit matter or on the accounts or disclosures to which it relates.

LIQUIDMETAL TECHNOLOGIES, INC AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(in thousands, except share and per share data)

1. DESCRIPTION OF BUSINESS

Liquidmetal Technologies, Inc. (the “Company”) is a materials technology and manufacturing company focused on the development and commercialization of products made from proprietary amorphous alloys and/or utilizing proprietary amorphous alloy manufacturing technologies. In addition to developing the Company’s manufacturing facility through our subsidiary in China, the Company works with third-party manufacturing and commercial partners to develop and commercial products made from proprietary amorphous alloys.

Amorphous alloys are, in general, unique materials that are distinguished by their ability to retain a random atomic structure when they solidify, in contrast to the crystalline atomic structure that forms in other metals and alloys when they solidify. Liquidmetal alloys are proprietary amorphous alloys that possess a combination of performance, processing, and potential cost advantages that the Company believes will make them preferable to other materials in a variety of applications. The amorphous atomic structure of bulk alloys enables them to overcome certain performance limitations caused by inherent weaknesses in crystalline atomic structures, thus facilitating performance and processing characteristics superior in many ways to those of their crystalline counterparts. The Company believes that the alloys and the molding technologies it employs may result in components, for many applications, that exhibit: exceptional dimensional control and repeatability that rivals precision machining, excellent corrosion resistance, brilliant surface finish, high strength, high hardness, high elastic limit, alloys that are non-magnetic, and the ability to form complex shapes common to the injection molding of plastics. Interestingly, all of these characteristics are achievable from the molding process, so design engineers often do not have to select specific alloys to achieve one or more of the characteristics as is the case with crystalline materials. The Company believes these advantages could result in Liquidmetal alloys supplanting high-performance alloys, such as titanium and stainless steel, and other incumbent materials in a wide variety of applications. Moreover, the Company believes these advantages could enable the introduction of entirely new products and applications that are not possible or commercially viable with other materials.

The Company’s revenues are derived from i) selling bulk Liquidmetal alloy products to customers who produce medical devices, automotive assemblies, sports and leisure goods, and non-consumer electronic devices, ii) selling tooling and prototype parts such as demonstration parts and test samples for customers with products in development, iii) product licensing and royalty revenue, and iv) research and development revenue. The Company expects that these sources of revenue will continue to significantly change the character of the Company’s revenue mix.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Principles of Consolidation

The consolidated financial statements include the accounts of Liquidmetal Technologies, Inc., its special-purpose wholly-owned subsidiary, Crucible Intellectual Property LLC, 20321 Valencia LLC, and Liquidmetal Golf. All intercompany balances and transactions have been eliminated.

Non-Controlling Interest

The results of operations attributable to the non-controlling interest of Liquidmetal Golf are presented within equity and are shown separately from the Company’s equity.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosures of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reported periods. Actual results could differ from those estimates. These management estimates are primarily related to impairment of long-lived assets, allowance for bad debt, warrant valuations, and inventory valuation.

Revenue Recognition

Revenue is recognized pursuant to applicable accounting standards including FASB ASC Topic 606 (“ASC 605”), Revenue from Contracts with Customers. ASC 606 summarizes certain points in applying generally accepted accounting principles to revenue recognition in financial statements and provides guidance on revenue recognition issues in the absence of authoritative literature addressing a specific arrangement or a specific industry.

The Company’s revenue recognition policy complies with the requirements of ASC 606. As a majority of the Company’s sales revenue continues to be recognized when products are shipped, and there was no change in the recognition model historically applied to active license and royalty contracts under the new revenue standard, there was no adjustment to the opening balance of retained earnings. The impact to the Company’s results of operations is not material, on an on-going basis, because the analysis of the Company’s contracts under the new revenue standard supports a recognition model consistent with the Company’s previous revenue recognition model. Revenue on the majority of the Company’s contracts will continue to be recognized over time because of the continuous transfer of control to the customer.

- ***Products***

Product revenues are primarily generated from the sale and prototyping of molds and bulk alloy products. Revenue is recognized when i) persuasive evidence of an arrangement exists, ii) delivery has occurred, iii) the sales price is fixed or determinable, iv) collection is probable and v) all obligations have been substantially performed pursuant to the terms of the arrangement. When the Company receives consideration, or such consideration is unconditionally due, from a customer prior to transferring goods or services to the customer under the terms of a sales contract, it records deferred revenue, which represents a contract liability. The Company will recognize deferred revenue as products revenue after it has transferred control of the goods or services to the customer and all revenue recognition criteria are met. Such amounts are not expected to be material on an ongoing basis.

- ***Licensing and royalties***

License revenue arrangements in general provide for the grant of an exclusive or non-exclusive right to manufacture and/or sell products covered by patented technologies owned or controlled by the Company. The intellectual property rights granted may be perpetual in nature, extending until the expiration of the related patents, or can be granted for a defined period of time. Licensing revenues that are one-time fees upon the granting of the license are recognized when i) the license term begins in a manner consistent with the nature of the transaction and the earnings process is complete, ii) when collectability is reasonably assured or upon receipt of an upfront fee, and iii) when all other revenue recognition criteria have been met. Pursuant to the terms of these agreements, the Company has no further obligation with respect to the grant of the license. Licensing revenues that are related to royalties are recognized as the royalties are earned over the related period.

Practical Expedients and Exemptions

The Company generally expenses sales commissions when incurred because the amortization period would have been one year or less. These costs are recorded within selling, marketing, general and administrative expenses. The Company does not disclose the value of unsatisfied performance obligations for (i) contracts with an original expected length of one year or less and (ii) contracts for which the Company recognizes revenue at the amount for which it has the right to invoice for services performed.

Advertising and Promotion Expenses

Advertising and promotion expenses are expensed when incurred. Advertising and promotion expenses were \$48 and \$113, for the years ended December 31, 2025 and 2024, respectively.

Research and Development Expenses

Research and development expenses represent salaries, related benefits expense, expenses incurred for the design and testing of new processing methods and other expenses related to the research and development of Liquidmetal alloys. Development costs incurred in research and development activities are expensed as incurred.

Cash and Cash equivalents

The Company considers all highly-liquid investments with maturity dates of three months or less when purchased to be cash equivalents. The Company limits the amount of credit exposure to each individual financial institution and places its temporary cash into investments of high credit quality with a financial institution that exceeds federally insured limits. The Company has not experienced any losses related to these balances and believes its credit risk to be minimal. As of December 31, 2025 and 2024, the Company held deposits of \$7,164 and \$6,011, respectively, in such highly-liquid investments.

Investments in debt securities

The Company will invest excess funds to maximize investment yield, while maintaining liquidity and minimizing credit risk. Debt securities are carried at fair value and consist primarily of investments in obligations of the United States Treasury, various U.S. and foreign corporations, and certificates of deposits. The Company classifies its investments in debt securities as available-for-sale with all unrealized gains or losses included as part of other comprehensive income. The Company evaluates its debt securities with unrealized losses on a quarterly basis for potential other-than-temporary impairments in value. As a result of this assessment, the Company did not recognize any other-than-temporary impairment losses considered to be credit related for the years ended December 31, 2025 and 2024.

Trade Accounts Receivable

The Company grants credit to its customers generally in the form of short-term trade accounts receivable. The creditworthiness of customers is evaluated prior to signing a contract with the customer. During 2025, there were three major customers, who together accounted for 86% of our revenue. During 2024, there were four major customers, who together accounted for 91% of our revenue. As of December 31, 2025, one customer represented 60%, or \$55, of the total outstanding trade accounts receivable. As of December 31, 2024, one customer represented 83%, or \$74, of the total outstanding trade accounts receivable. In the future, we expect that a significant portion of our revenue may continue to be concentrated in a limited number of customers, even if our bulk alloys business grows. In the future, the Company expects that a significant portion of the revenue may continue to be concentrated in a limited number of customers, even if the bulk alloys business grows.

The allowance for doubtful accounts reflects management's best estimate of probable losses inherent in the trade accounts receivable. Management primarily determines the allowance based on the aging of accounts receivable balances, historical write-off experience, customer concentrations, customer creditworthiness and current industry and economic trends. The Company's provisions for uncollectible receivables are included in selling, marketing, general and administrative expense in the consolidated statements of operations. At December 31, 2025 and 2024, the Company had recorded an allowance for doubtful accounts of \$0 and \$0, respectively.

Inventories

Inventories are stated at the lower of weighted-average cost or net realizable value. Inventories are recorded at actual cost when purchased and then expensed at weighted-average cost as used in production and/or shipped to satisfy customer orders. We perform an analysis of our inventory balances at least quarterly to determine if the carrying amount of inventories exceeds their net realizable value. The analysis of estimated net realizable value is based on customer orders, market trends and historical pricing. If the carrying amount exceeds the estimated net realizable value, the carrying amount is reduced to the estimated net realizable value.

Property and Equipment

Property and equipment are stated at cost less accumulated depreciation and amortization. Additions and major renewals are capitalized. Repairs and maintenance are charged to expense as incurred. Upon disposal, the related cost and accumulated depreciation are removed from the accounts, with the resulting gain or loss included in operating income. Depreciation is provided principally on the straight-line method over the estimated useful lives of the assets, which range from one to five years.

Investment Income (Loss)

Investment income (loss) relates to realized gains earned from our investments in debt securities for the respective periods.

Intangible Assets

Intangible assets consist of the costs incurred to purchase patent rights and costs incurred to register and maintain patents and trademarks. Intangible assets are reported at cost, net of accumulated amortization. Patents and trademarks are amortized using the straight-line method over a period based on their contractual lives ranging from ten to seventeen years.

Impairment of Long-lived Assets

The Company reviews long-lived assets to be held and used in operations for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may be impaired. These evaluations may result from significant decreases in the overall market outlook for the Company's technology or the market price of an asset, a significant adverse change in the extent or manner in which an asset is being used in its physical condition, a significant adverse change in legal factors or in the business climate that could affect the value of an asset, as well as economic or operational analyses. If the Company concludes that the carrying value of certain assets will not be recovered based on expected undiscounted future cash flows, an impairment write-down is recorded to reduce the assets to their estimated fair value. Fair value is determined via market, cost and income-based valuation techniques, as appropriate. The fair value is measured on a non-recurring basis using a combination of quoted prices for similar assets in active markets and other unobservable adjustments to historical cost (Level 3) inputs. No such charges were recorded for the years ended December 31, 2025 and December 31, 2024.

Fair Value Measurements

The estimated fair values of financial instruments reported in the consolidated financial statements have been determined using available market information and valuation methodologies, as applicable. The fair value of cash and restricted cash approximate their carrying value due to their short maturities and are classified as Level 1 instruments within the fair value hierarchy.

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. Entities are required to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value based upon the following fair value hierarchy:

- Level 1 — Quoted prices in active markets for identical assets or liabilities;
- Level 2 — Observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities; quoted prices in markets that are not active; or other inputs that are observable or can be corroborated by observable market data for substantially the full term of the assets or liabilities; and
- Level 3 — Unobservable inputs that are supported by little or no market activity and that are significant to the fair value of the assets or liabilities.

As of December 31, 2025, the following table represents the Company's fair value hierarchy for items that are required to be measured at fair value on a recurring basis:

	Fair Value	Level 1	Level 2	Level 3
Investments in debt securities (short-term)	4,917	4,817	100	-
Investments in debt securities (long-term)	7,606	5,481	2,125	-

As of December 31, 2024, the following table represents the Company's fair value hierarchy for items that are required to be measured at fair value on a recurring basis:

	Fair Value	Level 1	Level 2	Level 3
Investments in debt securities (short-term)	9,453	8,953	500	-
Investments in debt securities (long-term)	6,877	5,119	1,758	-

Non-recurring Fair Value Measurements

Certain assets and liabilities are measured at fair value on a nonrecurring basis. In other words, the instruments are not measured at fair value on an ongoing basis but are subject to fair value adjustments only in certain circumstances (for example, when there is evidence of impairment). No such losses were recorded during the year ended December 31, 2025 and 2024.

Stock-Based Compensation

The Company accounts for share-based compensation in accordance with the fair value recognition provisions of FASB ASC Topic 718, *Share-based Payment*, which requires all share-based payments to employees, including grants of employee stock options, to be recognized in the consolidated financial statements based on their fair values. The fair value of stock options is calculated by using the Black-Scholes option pricing formula that requires estimates for expected volatility, expected dividends, the risk-free interest rate and the term of the option. If any of the assumptions used in the Black-Scholes model change significantly, share-based compensation expense may differ materially in the future from that recorded in the current period.

Operating Leases

The Company adopted FASB Accounting Standards Codification, or ASC, Topic 842, Leases ("ASC 842") which requires the recognition of the right-of-use assets and relating operating and finance lease liabilities on the balance sheet. Under ASC 842, all leases are required to be recorded on the balance sheet and are classified as either operating leases or finance leases. The lease classification affects the expense recognition in the income statement. Operating lease charges are recorded entirely in operating expenses. Finance lease charges are split, where amortization of the right-of-use asset is recorded in operating expenses and an implied interest component is recorded in interest expense.

Income Taxes

Income taxes are provided under the asset and liability method as required by FASB ASC Topic 740, *Accounting for Income Taxes*. Under this method, deferred income taxes are recognized for the tax consequences of “temporary differences” by applying enacted statutory tax rates applicable to future years to differences between the financial statement carrying amounts and the tax basis of existing assets and liabilities. The effect of a tax rate change on deferred taxes is recognized in operations in the period that the change in the rate is enacted. Valuation allowances are established when necessary to reduce net deferred tax assets to the amount expected to be realized. Under the provisions of FASB ASC Topic 740, the Company had no material unrecognized tax positions and no adjustments to liabilities or operations were required. The Company, when applicable, will recognize interest and penalties related to uncertain tax positions in income tax expense. There was no expense related to interest and penalties for the years ended December 31, 2025 and 2024, respectively.

Earnings Per Share

Basic earnings per share (“EPS”) is computed by dividing earnings (losses) attributable to common shareholders by the weighted average number of common shares outstanding for the periods. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock.

Foreign Currency Translation

The Company has operations in China. Accounting records in foreign operations are maintained in local currencies and remeasured to the US dollars during the consolidation. Nonmonetary assets and liabilities are translated at historical rates, and monetary assets and liabilities are translated at exchange rates in effect at the end of the year. Income statement accounts are translated at average rates for the year. Gains or losses from remeasurement of foreign currency financial statements into the US dollars are included in current results of comprehensive income.

Recent Accounting Pronouncements.

In June 2016, the FASB issued an accounting standards update which changes the methodology for measuring credit losses on financial instruments and the timing of when such losses are recorded. This update replaces the existing incurred loss impairment model with an expected loss model (referred to as the Current Expected Credit Loss model, or “CECL”). The standard update, and its related amendments, will become effective for the fiscal year beginning on January 1, 2023. This did not have a material impact on its consolidated financial statements as of and for the year ended December 31, 2025.

Other recent accounting pronouncements issued by the FASB (including its Emerging Issues Task Force), the AICPA and the SEC did not or are not believed by management to have a material impact on the Company's present or future consolidated financial statements.

3. SIGNIFICANT TRANSACTIONS

Hangzhou Feifeng Liquidmetal Co., Ltd. Joint Venture

On July 4, 2025, Liquidmetal Asia Holdings Limited (“Liquidmetal Asia”), a Hong Kong based, wholly owned subsidiary of the Company, entered into a shareholders agreement with Mr. Chong Liu, an individual investor to form a new joint venture company named Hangzhou Feifeng Liquidmetal Co. Ltd., a limited liability company formed under the Peoples Republic of China (the “Joint Venture Company”). The Joint Venture Company was formed for the principal purpose of developing a manufacturing facility in Hangzhou, China for the manufacture of amorphous metal products. The Joint Venture Company will be owned 70% by Liquidmetal Asia and 30% by Mr. Liu and will be capitalized with \$6.0 million USD of initial capital, of which \$4.2 million has been contributed by Liquidmetal Asia, and \$1.8 million will be contributed by Mr. Liu on or before May 25, 2028. The Joint Venture Company will have full manufacturing capabilities in 2026.

Yihao Manufacturing Agreement

On January 12, 2022, the Company entered into a manufacturing agreement (“Manufacturing Agreement”) with Dongguan Yihao Metal Materials Technology Co. Ltd. (“Yihao”) to become an outsourced contract manufacturer of the Company’s product. Under the Manufacturing Agreement, which has a term of five years, Yihao has agreed to serve as a non-exclusive contract manufacturer for amorphous alloy parts offered and sold by the Company at prices determined on a “cost-plus” basis. Yihao is an affiliate of Dongguan Eontec Co. Ltd. and Professor Lugee Li, our chairman and largest beneficial owner of the Company’s capital stock.

Corporate Facility Purchase and Lease

On February 16, 2017, the Company purchased a 41,000 square foot facility (the “Facility”) located in Lake Forest, CA, where operations commenced during July 2017. The purchase price for the Facility was \$7,818.

On January 23, 2020, 20321 Valencia, LLC, a Delaware limited liability company and wholly owned subsidiary of the Company, entered into a lease agreement pursuant to which the Company leased to MatterHackers, Inc., a Delaware corporation (“Tenant”), an approximately 32,534 square foot portion of the Facility. The lease term was for 5 years and 2 months and expired on April 30, 2025. The base rent payable under the lease was \$32,534 per month initially and was subject to periodic increases up to a maximum of approximately \$54,000 per month. Tenant paid approximately 79% of common operating expenses.

On March 26, 2025, the Company entered into a new lease agreement (the “Facility Lease”) for a 5 year term commencing on May 1, 2025 and expanded the leased square footage to 40,090 square feet. The base rent payable under the Facility Lease is \$51,716 per month initially and is subject to periodic increases up to a maximum of approximately \$58,000 per month. Tenant will pay approximately 98% of building operating expenses. The Facility Lease grants the Company or Tenant the right to terminate the Facility Lease after two and a half years into the lease term and has other customary provisions, including provisions relating to default and usage restrictions.

2016 Purchase Agreement

On March 10, 2016, the Company entered into a Securities Purchase Agreement (the “2016 Purchase Agreement”) with Liquidmetal Technology Limited, a Hong Kong company (the “Investor”), which is controlled by the Company’s Chairman, Professor Li. The 2016 Purchase Agreement provided for the purchase by the Investor of a total of 405,000,000 shares of the Company’s common stock for an aggregate purchase price of \$63,400. The transaction occurred in multiple closings, with the Investor having purchased 105,000,000 shares at a purchase price of \$8,400 (or \$0.08 per share) at the initial closing on March 10, 2016 and the remaining 200,000,000 shares at \$0.15 per share and 100,000,000 shares at \$0.25 per share for an aggregate purchase price of \$55,000 on October 26, 2016. On October 10, 2024, the Investor sold 179,787,888 to various buyers leaving 225,212,112 shares of our common stock owned by the Investor as of December 31, 2025.

In addition to the shares issuable under the 2016 Purchase Agreement, the Company issued to the Investor a warrant to acquire 10,066,809 shares of common stock. The warrant expired March 10, 2026.

Eontec License Agreement

On March 10, 2016, in connection with the 2016 Purchase Agreement, the Company and DongGuan Eontec Co., Ltd., a Hong Kong corporation (“Eontec”), entered into a Parallel License Agreement (the “License Agreement”) pursuant to which the Company and Eontec agreed to cross-license their respective technologies. The Company’s Chairman, Professor Li, is also the Chairman of Eontec.

The License Agreement provides for the cross-license of certain patents, technical information, and trademarks between the Company and Eontec. In particular, the Company granted to Eontec a paid-up, royalty-free, perpetual license to the Company’s patents and related technical information to make, have made, use, offer to sell, sell, export, and import products in certain geographic areas outside of North America and Europe. In turn, Eontec granted to the Company a paid-up, royalty-free, perpetual license to Eontec’s patents and related technical information to make, have made, use, offer to sell, sell, export, and import products in certain geographic areas outside of specified countries in Asia. The license granted by the Company to Eontec is exclusive (including to the exclusion of the Company) in the countries of Brunei, Cambodia, China (P.R.C and R.O.C.), East Timor, Indonesia, Japan, Laos, Malaysia, Myanmar, Philippines, Singapore, South Korea, Thailand, and Vietnam. The license granted by Eontec to the Company is exclusive (including to the exclusion of Eontec) in North America and Europe. The cross-licenses are non-exclusive in geographic areas outside of the foregoing exclusive territories.

Eutectix Business Development Agreement

On January 31, 2020, the Company entered into a Business Development Agreement (the “Agreement”) with Eutectix, LLC, a Delaware limited liability company (“Eutectix”), which provided for collaboration, joint development efforts, and the manufacturing of products based on the Company’s proprietary amorphous metal alloys. Under the Agreement, the Company licensed to Eutectix specified equipment owned by the Company, including two injection molding machines, two diecasting machines, and other machines and equipment, all of which will be used to make product for Company customers and Eutectix customers. The Company has also licensed to Eutectix various patents and technical information related to the Company’s proprietary technology. The Agreement expired in January 2025.

Apple License Transaction

On August 5, 2010, the Company entered into a license transaction with Apple Inc. (“Apple”) pursuant to which (i) the Company contributed substantially all of its intellectual property assets to a newly organized special-purpose, wholly-owned subsidiary, called Crucible Intellectual Property, LLC (“CIP”), (ii) CIP granted to Apple a perpetual, worldwide, exclusive license to commercialize such intellectual property in the field of consumer electronic products, as defined in the license agreement, in exchange for a one-time, upfront license fee, and (iii) CIP granted back to the Company a perpetual, worldwide, fully-paid, exclusive license to commercialize such intellectual property in all other fields of use.

Under the agreements relating to the license transaction with Apple, the Company was obligated to contribute, to CIP, all intellectual property developed through February 2016. The Company is also obligated to maintain certain limited liability company formalities with respect to CIP at all times after the closing of the license transaction.

Liquidmetal Golf Sublicense Agreement

Liquidmetal Golf Inc. (“Liquidmetal Golf” or “LMG”) is a majority-owned subsidiary which has the exclusive right and license to utilize our Liquidmetal alloy technology for purposes of golf equipment applications. This right and license is set forth in an intercompany license agreement dated January 1, 2002 between Liquidmetal Technologies and Liquidmetal Golf. This license agreement provides that Liquidmetal Golf has a perpetual and exclusive license to use Liquidmetal alloy technology for the purpose of manufacturing, marketing, and selling golf club components and other products used in the sport of golf. The Company owns 79% of the outstanding common stock in Liquidmetal Golf.

On January 13, 2022, Liquidmetal Golf entered into a sublicense agreement (“LMG Sublicense Agreement”) with Amorphous Technologies Japan, Inc. (“ATJ”), a newly formed Japanese entity that was established by Twins Corporation, a sporting goods company operating in Japan. Under the agreement, LMG granted to ATJ a nonexclusive worldwide sublicense to the Company’s amorphous alloy technology and related trademarks to manufacture and sell golf clubs and golf related products. The LMG Sublicense Agreement had an initial term of three years and has been extended for another three year term that provides for the payment of a running royalty to LMG of 3% of the net sales price of licensed products.

Swatch Group License

In March 2009, the Company entered into a license agreement with Swatch Group, Ltd. (“Swatch”) under which Swatch was granted a non-exclusive license to the Company’s technology to produce and market watches and certain other luxury products. In March 2011, this license agreement was amended to grant Swatch exclusive rights as to watches as against all third parties (including the Company), but non-exclusive as to Apple. The Company will receive royalty payments over the life of the contract on all Liquidmetal products produced and sold by Swatch. The license agreement with Swatch will expire on the expiration date of the last licensed patent.

4. INVESTMENTS IN DEBT SECURITIES

The following table sets forth amortized cost and fair value of investments in debt securities (short-term and long-term):

	Longest Maturity Date	Amortized Cost		Fair Value	
		December 31,	December 31,	December 31,	December 31,
		2025	2024	2025	2024
U.S. government and agency securities	2029	9,254	13,415	9,402	13,489
Corporate bonds	2031	3,062	2,820	3,121	2,841
Certificates of deposit	One-year	12,316	16,235	12,523	16,330

Income from these investments totaled \$751 and \$1,136 during the years ended December 31, 2025 and 2024, respectively, and was included as a portion of interest and investment income on the Company’s consolidated statements of operations.

Based on the Company’s review of its debt securities in an unrealized loss position at December 31, 2025, it determined that the losses were primarily the result of current economic factors, impacting all global debt and equity markets, that are the result of the global COVID-19 pandemic. The impact to the Company’s investment portfolio is considered to be temporary, rather than a deterioration of overall credit quality. The Company does not intend to sell and it is not more likely than not that the Company will be required to sell these securities prior to recovering their amortized cost. As such, the Company does not consider these securities to be other-than-temporarily impaired at December 31, 2025.

Investment in debt securities activities consisted of the following:

	Years ended December 31,	
	2025	2024
Investment in debt securities – beginning balance	\$ 16,330	\$ 14,390
Purchases	7,132	20,233
Sales at cost	(11,036)	(18,356)
Realized gain from sale of investment in debt securities	102	266
Interest and dividend income	675	870
Unrealized gain	230	107
Professional management fees and other fees	(44)	(54)
Withdrawals from debt securities	(866)	(1,126)
Investment in debt securities – ending balance	12,523	16,330
Less – current portion	(4,917)	(9,453)
Investment in debt securities – non-current	<u>\$ 7,606</u>	<u>\$ 6,877</u>

5. TRADE ACCOUNTS RECEIVABLE

Trade accounts receivable were comprised of the following:

	December 31,	
	2025	2024
Accounts receivables	\$ 91	\$ 89
AR allowance	-	-
Total	<u>\$ 91</u>	<u>\$ 89</u>

During the year ended December 31, 2025 and 2024, there was no allowance for doubtful accounts.

6. PREPAID EXPENSES AND OTHER CURRENT ASSETS

Prepaid expenses and other current assets consisted of the following:

	December 31,	
	2025	2024
Prepaid equipment and service invoices	\$ 956	\$ 85
Prepaid insurance premiums	210	208
Prepaid lease costs and receivables- short term	33	64
Interest and other receivables	103	137
Total	<u>\$ 1,302</u>	<u>\$ 494</u>

7. INVENTORIES

Inventories consisted of the following:

	December 31,	
	2025	2024
Work in progress	\$ -	\$ -
Finished goods	46	70
Total	<u>\$ 46</u>	<u>\$ 70</u>

8. PROPERTY AND EQUIPMENT

Property and equipment consisted of the following:

	December 31,	
	2025	2024
Land, building, and improvements	\$ 9,610	\$ 9,610
Machinery and equipment	1,304	1,304
Computer equipment	275	272
Office equipment, furnishings, and improvements	51	51
Total	11,240	11,237
Accumulated depreciation	(4,190)	(3,880)
Total	<u>\$ 7,050</u>	<u>\$ 7,357</u>

Depreciation expense for the years ended December 31, 2025 and 2024 was \$311 and \$310, respectively, and is included in selling, marketing, general and administrative expenses.

9. PATENTS AND TRADEMARKS, NET

Patents and trademarks consist of the following:

	December 31,	
	2025	2024
Purchased and licensed patent rights	\$ 566	\$ 566
Internally developed patents	1,685	1,686
Trademarks	148	148
Total	2,399	2,400
Accumulated depreciation	(2,378)	(2,365)
Total	<u>\$ 21</u>	<u>\$ 35</u>

Amortization expense was \$14 and \$17 for the years ended December 31, 2025 and 2024, respectively, and is included in research and development expense in the consolidated statements of operations and comprehensive loss. The estimated aggregate amortization expense for each of the five succeeding years is as follows:

December 31,	Aggregate Amortization Expense
2026	\$ 21
	<u>\$ 21</u>

The weighted average years of amortization are as follows:

	(in years) December 31,	
	2025	2024
Purchased and licensed patent rights	17	17
Internally developed patents	17	17
Trademarks	10	10

Purchased patent rights represent the exclusive right to commercialize the bulk amorphous alloy and other amorphous alloy technology acquired from California Institute of Technology (“Caltech”), through a license agreement with Caltech and other institutions. All fees and other amounts payable by the Company for these rights and licenses have been paid or accrued in full, and no further royalties, license fees or other amounts will be payable in the future under the license agreements.

In addition to the purchased and licensed patents, the Company has capitalized legal and registration costs incurred to obtain and maintain the respective patents. The Company currently holds various patents and numerous pending patent applications in the United States, as well as numerous foreign counterparts to these patents outside of the United States.

10. OTHER ASSETS

Other assets consisted of the following:

	December 31,	
	2025	2024
Utility deposits	\$ 14	\$ 14
Deposits	94	-
Total	<u>\$ 108</u>	<u>\$ 14</u>

11. ACCRUED LIABILITIES

Accrued liabilities consisted of the following:

	December 31,	
	2025	2024
Accrued payroll, vacation, and bonuses	\$ 114	\$ 151
Accrued audit fees	50	54
	<u>\$ 165</u>	<u>\$ 205</u>

12. OTHER CURRENT LIABILITIES

Other current liabilities was \$902 as of December 31, 2025 and 2024, and consisted of \$859 of aged payables to vendors, individuals, and other third parties that have been outstanding for more than 5 years. Also included in the balance as of December 31, 2025 and 2024 is \$43 in tenant deposits under the Facility Lease.

The Company is in the process of researching and resolving the balances for settlement and/or escheatment in accordance with applicable state law.

13. STOCK COMPENSATION PLAN

On June 28, 2012, the Company adopted the 2012 Equity Incentive Plan ("2012 Plan"), with the approval of the shareholders, which provided for the grant of stock options to officers, employees, consultants and directors of the Company and its subsidiaries. Under this plan, the Company had outstanding grants of options to purchase 2,432,500 and 3,073,000 shares of the Company's common stock as of December 31, 2025 and December 31, 2024, respectively. The 2012 Plan expired in June 2022.

On January 27, 2015, the Company adopted its 2015 Equity Incentive Plan ("2015 Plan"), which provided for the grant of stock options to officers, employees, consultants and directors of the Company and its subsidiaries. A total of 40,000,000 shares of the Company's common stock are available for issuance under the 2015 Plan. All options granted under the 2015 Plan had exercise prices that were equal to the fair market value on the dates of grant. On July 7, 2021, the Company granted Mr. Chung an option grant under the Company's 2015 Equity Incentive Plan, as approved by the Board, to purchase up to 7,500,000 shares of Company stock. Under the 2015 Plan, the Company granted options on July 7, 2021 to purchase 7,500,000 shares of Company common stock to Mr. Chung, options on December 16, 2021 to purchase 600,000 shares of Company's common stock to directors, and options on March 12, 2024 to purchase 9,250,000 shares of Company's common stock to employees and director. Under this plan, the Company had outstanding grants of options to purchase 22,861,667 and 23,511,667 as of December 31, 2025 and December 31, 2024, respectively. The 2015 Plan expired in January 2025.

FASB ASC 718, *Compensation – Stock Compensation*, requires all share-based payments to employees, including grants of employee stock options, to be recognized in the financial statements based on their fair values. Under ASC 718, the Company is required to measure the cost of employee services received in exchange for stock options and similar awards based on the grant-date fair value of the award and recognize this cost in the income statement over the period during which an employee is required to provide service in exchange for the award. The Company recorded \$150 and \$144 for the years ended December 31, 2025 and 2024, respectively, of non-cash charges for stock compensation related to amortization of the fair value of restricted stock and unvested stock options. The total compensation costs related to non-vested awards not yet recognized were \$150 and \$259 for the years ended December 31, 2025 and 2024, respectively.

Expected volatilities are based on historical volatility expected over the expected life of the options. The Company uses historical data to estimate option exercise and employee termination within the valuation model. The expected term of options granted represents the period of time that options granted are expected to be outstanding. Expected forfeiture rates are determined based on historical forfeitures over a five-year period. The risk-free rate used for the period within the expected life of the options is based on U.S. Treasury rates in effect at the time of grant.

The following table summarizes the Company's stock option transactions:

	Number of Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term	Aggregate Intrinsic Value (in thousands)
Options outstanding at December 31, 2023	17,956,334	\$ 0.11		
Granted	9,250,000	0.05		
Exercised	-	-		
Forfeited	-	-		
Expired	(191,667)	0.14		
Options outstanding at December 31, 2024	27,014,667	\$ 0.09	5.94	\$ -
Granted	15,000,000	0.04		
Exercised	-	-		
Forfeited	(166,675)	0.05		
Expired	(693,825)	0.14		
Options outstanding at December 31, 2025	40,294,167	\$ 0.07	6.81	\$ -
Options exercisable at December 31, 2025	21,543,978	\$ 0.10	4.91	\$ -
Options unvested at December 31, 2025	18,750,189	\$ 0.04	8.63	\$ -
Options vested or expected to vest at December 31, 2025	35,833,919	\$ 0.08	6.53	\$ -

The following table provides supplemental data on stock options:

	Years Ended December 31,	
	2025	2024
Weighted average grant date fair value per option granted	\$ 0.04	\$ 0.03
Fair value of options vested	191	70
Cash from participants to exercise stock options	-	-
Intrinsic value of options exercised	-	-

The following table summarizes the Company's stock options outstanding and exercisable by ranges of option prices as of December 31, 2025 and 2024:

December 31, 2025

Range of Exercise Prices	Options Outstanding			Options Exercisable		
	Numbers of Options Outstanding	Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price	Numbers of Options Outstanding	Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price
\$0.05 - \$0.08	31,452,500	7.91	\$ 0.05	13,202,311	6.40	\$ 0.06
\$0.09 - \$0.135	4,900,000	3.28	\$ 0.10	4,900,000	3.28	\$ 0.10

\$0.23 - \$0.345	2,546,667	1.01	\$ 0.24	2,546,667	1.01	\$ 0.24
\$0.38 - \$0.57	175,000	1.03	\$ 0.38	100,000	1.80	\$ 0.38
Total :	40,294,167			21,468,978		

Range of Exercise Prices	Options Outstanding			Options Exercisable		
	Numbers of Options Outstanding	Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price	Numbers of Options Outstanding	Weighted Average Remaining Contractual Life (Years)	Weighted Average Exercise Price
\$0.05 - \$0.08	17,497,500	7.68	\$ 0.06	8,247,500	5.97	\$ 0.07
\$0.09 - \$0.135	5,050,500	3.24	\$ 0.10	4,772,708	3.41	\$ 0.10
\$0.14 - \$0.21	1,145,000	1.83	\$ 0.14	1,145,000	1.83	\$ 0.14
\$0.23 - \$0.345	2,716,667	1.79	\$ 0.25	2,716,667	1.79	\$ 0.25
\$0.38 - \$0.57	175,000	1.60	\$ 0.38	175,000	1.60	\$ 0.38
Total :	26,584,667			17,056,875		

The Company's non-vested options at the beginning and ending of fiscal year 2025 had weighted-average grant-date fair values of \$0.09 and \$0.07 per option, respectively.

14. FACILITY LEASES

Amounts collected under the Facility Lease are comprised of base rents and reimbursements for direct facility expenses (property taxes and insurance), common area maintenance, and utilities. Amounts recorded to lease income are comprised of base rents and direct facility expenses, recorded on a straight-line basis over the lease term. Reimbursements for common area maintenance and utility expense are recorded as reductions to like expenses within sales, general, and administrative costs.

The future minimum rents due to the Company under the Facility Lease are as follows:

Year	Base Rents
2026	\$ 757
2027	776
2028	796
2029	816
2030	274
	<u>\$ 3,419</u>

15. OPERATING LEASE

On July 4, 2025, the Company entered into a non-cancelable facility lease commencing and expiring on July 3, 2028, for approximately 6,600 square meters of industrial space in Hangzhou, China. The lease term is 36 months and includes a three-month rent-free period from July 4, 2025 through October 3, 2025, during which only property management fees and utilities are payable. Base rent is \$29 per month. The lease is denominated in Renminbi ("RMB" or "yuan"), and the lease liability and right-of-use asset are initially measured in RMB and translated into U.S. dollars for consolidated financial reporting purposes in accordance with ASC830.

In accordance with ASC 842, the components of lease expense were as follows:

<i>For the years ended December 31,</i>	<i>2025</i>	<i>2024</i>
Operating lease expense	\$ 85	\$ -
Total lease expense	\$ 85	\$ -

In accordance with ASC 842, other information related to leases was as follows:

<i>For the years ended December 31,</i>	<i>2025</i>	<i>2024</i>
Operating cash flows from operating leases	\$ 85	\$ -
Cash paid for amounts included in the measurement of lease liabilities	\$ 85	\$ -

In accordance with ASC 842, the components of lease expense were as follows:

2026	\$ 351
2027	351
2028	175
2029	-
2030	-
Thereafter	-
Total undiscounted cash flows	\$ 877
Reconciliation of lease liabilities:	
Weighted-average remaining lease terms (years)	2.5
Weighted-average discount rate	6.0%
Present values	\$ 809
Lease liabilities—current	309
Lease liabilities—long-term	500
Lease liabilities—total	809
Difference between undiscounted and discounted cash flows	\$ 68

16. INCOME TAXES

Income tax (benefit) expense consists of the following:

	<u>Current</u>	<u>Deferred</u>	<u>Valuation Allowance</u>	<u>Total</u>
Fiscal 2025:				
Federal	\$ (525)	\$ (32,846)	\$ 33,371	\$ -
State	(227)	(10,683)	10,910	-
	<u>\$ (752)</u>	<u>\$ (43,529)</u>	<u>\$ 44,281</u>	<u>\$ -</u>
Fiscal 2024:				
Federal	\$ (334)	\$ (33,008)	\$ 33,342	\$ -
State	(145)	(10,405)	10,550	-
	<u>\$ (479)</u>	<u>\$ (43,413)</u>	<u>\$ 43,892</u>	<u>\$ -</u>

Significant components of deferred tax assets are as follows:

	<u>Years Ended December 31,</u>	
	<u>2025</u>	<u>2024</u>
Loss carry forwards	\$ 41,898	\$ 41,551
NQSO	2,395	2,353
Tax credits and other	(12)	(12)
Total deferred tax asset	\$ 44,281	\$ 43,892
Valuation allowance	(44,281)	(43,892)
Total deferred tax asset, net	\$ -	\$ -

The valuation allowance increased \$389 and increased \$335 in 2025 and 2024, respectively. Changes in the valuation allowance are impacted by the expiration of net operating loss (“NOL”) carryforwards, current year net operating losses, and changes to future tax deductions resulting from the terms of stock compensation plans and accrued liabilities.

The following table accounts for the differences between the expected federal tax benefit (based on the statutory 2025 and 2024 U.S. federal income tax rate of 21%) and the actual tax provision:

	Years Ended December 31,			
	2025		2024	
Expected federal tax benefit	\$	(33,371)	-21.0%	\$ (33,342) -21.0%
Permanent items		-	0.0%	- 0.0%
Net operating loss utilized or expired		-	0.0%	- 0.0%
Increase in valuation allowance and others		33,371	21.0%	33,342 21.0%
Effective tax rate	\$	-	0.0%	\$ - 0.0%

As of December 31, 2025, the Company had approximately \$151,161 of NOL carryforwards for U.S. federal income tax purposes expiring in 2025 through 2046. As of December 31, 2025, the Company had approximately \$110,940 of NOL carryforwards for California income tax purposes expiring in 2024 through 2046. The Company and Liquidmetal Golf, Inc. file on a separate company basis for federal income tax purposes. Accordingly, the federal NOL carryforwards of one legal entity are not available to offset federal taxable income of the other. Liquidmetal Golf, Inc. had approximately \$983 in federal NOL carryforwards, expiring in 2025 through 2046.

We recognize excess tax benefits associated with the exercise of stock options directly to shareholders' equity only when realized. Accordingly, deferred tax assets are not recognized for NOL carryforwards resulting from excess tax benefits. As of December 31, 2025, deferred tax assets do not include approximately \$75 of these tax effected excess tax benefits from employee stock option exercise that are a component of our NOL carryforwards. Accordingly, additional paid-in capital will increase up to an additional \$75 if and when such excess tax benefits are realized.

As of December 31, 2025, the Company had approximately \$553 of Research & Development ("R&D") credit carryforwards for U.S. federal income tax purposes expiring in 2025 through 2034. In addition, the Company has California R&D credit carryforwards of approximately \$243, which do not expire under current California law. Section 382 of the Internal Revenue Code ("IRC") imposes limitations on the use of NOL's and credits following changes in ownership as defined in the IRC. The limitation could reduce the amount of benefits that would be available to offset future taxable income each year, starting with the year of an ownership change. As a result of the completion of the complex analysis required by the IRC to determine if an ownership change has occurred, the Company has determined that its annual NOL carryforward limitation under Section 382 of the IRC is \$764 per year.

The ability to realize the tax benefits associated with deferred tax assets, which includes benefits related to NOL's, is principally dependent upon the Company's ability to generate future taxable income from operations. The Company has provided a full valuation allowance for its net deferred tax assets due to the Company's net operating losses.

The Company adopted the provisions of FASB ASC Topic 470 – Income Taxes. At the adoption date and as of December 31, 2020, the Company had no material unrecognized tax benefits and no adjustments to liabilities or operations were required. The Company recognizes interest and penalties related to uncertain tax positions in income tax expense which were \$0 for the years ended December 31, 2025 and 2024.

As of December 31, 2025, the tax years 2018 through 2025, and 2017 through 2025 are subject to examination by the federal and California taxing authorities, respectively.

17. Accumulated Other Comprehensive Income ("AOCI"):

The following table presents a summary of the changes in each component of AOCI for the years ended December 31, 2025 and 2024:

	Unrealized gains on available-for-sale securities
Accumulated other comprehensive income, net of tax, as of December 31, 2023	\$ 190
Other comprehensive – unrealized loss on investments	(83)
Accumulated other comprehensive income, net of tax, as of December 31, 2024	107
Other comprehensive – unrealized gain on investments	125
Other comprehensive – gain on foreign currency translation	13
Accumulated other comprehensive loss, net of tax, as of December 31, 2025	\$ 245

18. Loss Per Common Share

Basic earnings per share (“EPS”) is computed by dividing earnings (loss) attributable to common shareholders by the weighted average number of common shares outstanding for the periods. Diluted EPS reflects the potential dilution of securities that could share in the earnings.

Options to purchase 40,294,167 shares of common stock at prices ranging from \$0.07 to \$0.57 per share were outstanding at December 31, 2025, but were not included in the computation of diluted EPS for the same period as the inclusion would have been antidilutive, given the Company’s net loss. Options to purchase 26,584,667 shares of common stock at prices ranging from \$0.07 to \$0.38 per share were outstanding at December 31, 2024, but were not included in the computation of diluted EPS for the same period as the inclusion would have been antidilutive, given the Company’s net loss.

Warrants to purchase 10,066,809 shares of common stock, priced at \$0.07 per share, outstanding at each of December 31, 2025 and 2024 were not included in the computation of diluted EPS for the same period as the inclusion would have been antidilutive, given the Company’s net loss.

19. Related Party Transactions

On March 10, 2016, the Company entered into the 2016 Purchase Agreement with Liquidmetal Technology Limited, providing for the purchase of 405,000,000 shares of the Company’s common stock for an aggregate purchase price of \$63,400. Liquidmetal Technology Limited was a newly formed company owned by Professor Li. In connection with the 2016 Purchase Agreement and also on March 10, 2016, the Company and Eontec, entered into a license agreement pursuant to which the Company and Eontec entered into a cross-license of their respective technologies. Eontec is a publicly held Hong Kong corporation of which Professor Li is the Chairman. Eontec is also an affiliate of Yihao. Yihao is currently the Company’s primary contract manufacturer. As of December 31, 2025, Professor Li is a greater-than 5% beneficial owner of the Company and serves as the Company’s Chairman. Equipment and services procured from Eontec, and their affiliates, were \$439 and \$612 during the years ended December 31, 2025 and 2024, respectively. As of December 31, 2025 and 2024, the Company has outstanding payables to Eontec, and their affiliates of \$47 and \$70, respectively.

20. Subsequent Events

The Company follows the guidance in FASB ASC Topic 855, Subsequent Events (“ASC 855”), which provides guidance to establish general standards of accounting for and disclosures of events that occur after the balance sheet date but before the consolidated financial statements are issued or are available to be issued. ASC 855 sets forth (i) the period after the balance sheet date during which management of a reporting entity evaluates events or transactions that may occur for potential recognition or disclosure in the consolidated financial statements, (ii) the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in its consolidated financial statements, and (iii) the disclosures that an entity should make about events or transactions that occurred after the balance sheet date. Accordingly, the Company did not have any subsequent events that require disclosure.

Insider Trading Policy

Because the common stock of Liquidmetal® Technologies, Inc. (the "Company") is publicly traded, there are certain important restrictions and limitations imposed on your ability to trade Company common stock under the federal securities laws. The purchase or sale of Company common stock while aware of material nonpublic information, or the disclosure of material nonpublic information to others who then trade in the Company's common stock, is prohibited by the federal securities laws. Insider trading violations are pursued vigorously by the SEC and the U.S. Attorneys and are punished severely. While the regulatory authorities concentrate their efforts on the individuals who trade, or who tip inside information to others who trade, the federal securities laws also impose potential liability on companies and other "controlling persons" if they fail to take reasonable steps to prevent insider trading by company personnel.

The Need For a Policy Statement

The Company's Board of Directors has adopted this Policy Statement both to satisfy the Company's obligation to prevent insider trading and to help Company personnel avoid the severe consequences associated with violations of the insider trading laws. The Policy Statement also is intended to prevent even the appearance of improper conduct on the part of anyone employed by or associated with the Company (not just so-called insiders). We have all worked hard to establish a reputation for integrity and ethical conduct, and we cannot afford to have that reputation damaged.

The Consequences

The consequences of an insider trading violation can be severe. Company personnel (or their tippees) who trade on inside information are subject to the following penalties:

- A civil penalty of up to three times the profit gained or loss avoided;
- A criminal fine of up to \$5,000,000 (no matter how small the profit); and
- A jail term of up to twenty years.

Also, an employee who tips information to a person who then trades is subject to the same penalties as the tippee, even if the employee did not trade and did not profit from the tippee's trading. The Company and its supervisory personnel, if they fail to take appropriate steps to prevent illegal insider trading, are subject to the following penalties:

- A civil penalty of up to \$1,000,000 or, if greater, three times the profit gained or loss avoided as a result of the employee's violation; and
- A criminal penalty of up to \$5,000,000 dollars.

An employee's failure to comply with the Company's insider trading policy may subject the employee to Company-imposed sanctions, including dismissal for cause, whether or not the employee's failure to comply results in a violation of law. Needless to say, a violation of law, or even an SEC investigation that does not result in prosecution, can tarnish one's reputation and irreparably damage a career.

Statement of Policy

It is the policy of the Company that no director, officer or other employee of the Company who is aware of material nonpublic information relating to the Company may, directly or through family members or other persons or entities, (a) buy or sell securities of the Company (other than pursuant to a pre-approved trading plan that complies with SEC Rule 10b5-1), or engage in any other action to take personal advantage of that information, or (b) pass that information on to others outside the Company, including family and friends. In addition, it is the policy of the Company that no director, officer or other employee of the Company who, in the course of working for the Company, learns of material nonpublic information about a company with which the Company does business, including a customer or supplier of the Company, may trade in that company's securities until the information becomes public or is no longer material.

Transactions that may be necessary or justifiable for independent reasons (such as the need to raise money for an emergency expenditure) are not excepted from the policy. The securities laws do not recognize such mitigating circumstances, and, in any event, even the appearance of an improper transaction must be avoided to preserve the Company's reputation for adhering to the highest standards of conduct.

Blackout Periods. From time to time, the Company's management may determine that, in light of material nonpublic events then affecting the Company, some or all employees and directors should be prohibited from trading Company securities for a specified period of time (a so-called blackout period), even if they are not aware of such material nonpublic events. In this case, the Company's management will notify the selected employees and directors (or all employees or directors, if determined by management) that they are being subjected to a prohibition on trading Company securities for the period of time specified in the notice. It is important to note that the event giving rise to the blackout period will typically not be announced, but all notified persons will nevertheless be required to comply with the blackout period limitations. The blackout period restrictions will be in addition to, and not in lieu of, the other restrictions and limitation imposed by this Policy Statement, and the failure of management to designate a person as being subject to a blackout will not relieve that person of the obligation to refrain from trading while aware of material nonpublic information.

Disclosure Of Information To Others. The Company is required under Regulation FD of the federal securities laws to avoid the selective disclosure of material nonpublic information. The Company has established procedures for releasing material information in a manner that is designed to achieve broad public dissemination of the information immediately upon its release. You may not, therefore, disclose information to anyone outside the Company, including family members and friends, other than in accordance with those procedures. You also may not discuss the Company or its business in an internet "chat room" or similar internet-based forum.

Material Information. "Material" information is any information that a reasonable investor would consider important in making a decision to buy, hold, or sell securities. Any information that could be expected to affect the Company's stock price, whether it is positive or negative, should be considered material. Some examples of information that ordinarily would be regarded as material are:

- Projections of future earnings or losses, or other earnings guidance
- Earnings that are inconsistent with the consensus expectations of the investment community
- A pending or proposed merger, acquisition or tender offer
- A pending or proposed acquisition or disposition of a significant asset
- A change in dividend policy, the declaration of a stock split, or an offering of additional securities
- A change in management
- Development of a significant new product or process
- Impending bankruptcy or the existence of severe liquidity problems
- The gain or loss of a significant customer or supplier

Twenty-Twenty Hindsight. Remember, anyone scrutinizing your transactions will be doing so after the fact, with the benefit of hindsight. As a practical matter, before engaging in any transaction, you should carefully consider how enforcement authorities and others might view the transaction in hindsight.

When Information is "Public". If you are aware of material nonpublic information, you may not trade until the information has been disclosed broadly to the marketplace (such as by press release or an SEC filing) and the investing public has had time to absorb the information fully. Information will not be considered fully absorbed by the marketplace until after the second business day after the information is released. If, for example, the Company were to make an announcement on a Monday, you should not trade in the Company's securities until Thursday. If an announcement were made on a Friday, Wednesday would be the first eligible trading day.

Transactions by Family Members. The insider trading policy also applies to your family members who reside with you, anyone else who lives in your household, and any family members who do not live in your household but whose transactions in company securities are directed by you or are subject to your influence or control (such as parents or children who consult with you before they trade in company securities). You are responsible for the transactions of these other persons and therefore should make them aware of the need to confer with you before they trade in the Company's securities.

Stock Option Exercises. The Company's insider trading policy does not apply to the exercise of an employee stock option. The policy does apply, however, to any sale of stock as part of a broker-assisted cashless exercise of an option (if such is permitted by the Company), or any other market sale for the purpose of generating the cash needed to pay the exercise price of an option.

Margin Loans and Stock Pledges. Securities held in a margin account may be sold by the broker without the customer's consent if the customer fails to meet a margin call. Similarly, securities pledged (or hypothecated) as collateral for a loan may be sold in foreclosure if the borrower defaults on the loan. Because a margin sale or foreclosure sale may occur at a time when the borrower is aware of material nonpublic information or otherwise is not permitted to trade in Company stock, directors, officers, and other employees are prohibited from holding Company stock in a margin account or pledging Company stock as collateral for a loan.

Short Sales. No director, officer, or employee may, directly or indirectly, sell any equity security, including derivatives, of the Company if the person selling the security or his principal (1) does not own the security sold, or (2) if owning the security, does not deliver it against such sale within 20 days thereafter, or does not within five days after such sale deposit it in the mail or other usual channels of transportation. A "short sale" is any transaction whereby one may benefit from a decline in the Company's stock price. Short sales of the Company's securities evidence an expectation on the part of the seller that the securities will decline in value, and therefore signal to the market that the seller has no confidence in the Company or its short-term prospects. In addition, short sales may reduce the seller's incentive to improve the Company's performance. For these reasons, short sales of the Company's securities are prohibited by this Policy Statement.

Short-term Trades. An employee's short-term trading of the Company's securities may be distracting to the employee and may unduly focus the employee on the Company's short-term stock market performance instead of the Company's long-term business objectives. For these reasons, any director, officer, or other employee of the Company who purchases Company securities in the open market may not sell any company securities of the same class or type during the six months following the purchase.

Publicly Traded Options. A transaction in options is, in effect, a bet on the short-term movement of the Company's stock and therefore creates the appearance that the director or employee is trading based on inside information. Transactions in options also may focus the director's or employee's attention on short-term performance at the expense of the Company's long-term objectives. Accordingly, transactions in puts, calls, or other derivative securities, on an exchange or in any other organized market, are prohibited by this Policy Statement.

Post-Termination Transactions. The Policy Statement continues to apply to your transactions in Company securities even after you have terminated employment. If you are in possession of material nonpublic information when your employment terminates, you may not trade in Company securities until that information has become public or is no longer material.

Additional Restrictions Applicable to Executive Officers, Directors, and Key Employees

In addition to the restrictions set forth above, persons who serve as directors, executive officers, and key employees of the Company, as well as officers, directors, and key employees of certain subsidiaries of the Company (collectively referred to as “Covered Persons”), are subject to additional restrictions on when they may purchase or sell Company common stock. YOU WILL BE NOTIFIED BY THE COMPANY IF THE COMPANY CONSIDERS YOU TO BE A “COVERED PERSON.”

The Company has adopted that policy that all Covered Persons must contact the Company’s Chief Executive Officer in advance of making any commitment to purchase (or otherwise acquire) or sell (or otherwise dispose of) Company stock. In addition, a Covered Person is only permitted to purchase or sell Company common stock during four “window periods,” provided that the Covered Person is not then in possession of material nonpublic information concerning the Company. These window periods begin on the third trading day after the Company’s public release of its quarterly or annual results of operations. Each window period lasts for thirty (30) calendar days. However, even if a Covered Person desires to sell Company common stock during a window period, the Covered Person must still pre-clear the trade with the Chief Executive Officer to ensure that no inadvertent violation of the insider trading laws occurs. Sales outside the window periods may be allowed under certain limited circumstances (such as sales pursuant to a pre-approved trading plan that complies with SEC Rule 10b5-1), provided of course that no material nonpublic information then exists concerning the Company and you pre-clear your transaction with the Chief Executive Officer.

Company Assistance

Any person who has a question about this Policy Statement or its application to any proposed transaction may obtain additional guidance from Tony Chung at (949) 635-2170 or tony.chung@liquidmetal.com. Ultimately, however, the responsibility for adhering to this Policy Statement and avoiding unlawful transactions rests with the individual employee.

Re: Change of Control Agreement

Dear _____,

WHEREAS the Board of Directors (the "Board") of Liquidmetal Technologies, Inc. (the "Company") has determined that it is in the best interest of the Company and its stockholders for the Company to agree to provide benefits to those executives, including yourself, who are responsible for the policy-making functions of the Company and the overall viability of the Company's business, in the event that such executives should leave the employ of the Company under the circumstances described below;

WHEREAS, the Company recognizes that circumstances may arise in which a potential change in control of the Company arises, through proposed acquisition or otherwise, thereby causing a potential conflict of interest between the Company's needs for you to remain focused on the Company's business and for the necessary continuity in management prior to and following a change in control, and your reasonable personal concerns regarding future employment with the Company and economic protection in the event of loss of employment as a consequence of a change in control; and

WHEREAS the Board believes it important, should the Company receive proposals from third parties with respect to its future, to enable you, without being influenced by the uncertainties of your own employment situation and in addition to your regular duties, to assess and advise the Board whether such proposals would be in the best interest of the Company and its stockholders and to take such other action regarding such proposals as the Board might determine to be appropriate; and

WHEREAS the Board also wishes to demonstrate to executives of the Company that the Company is concerned with welfare of its executives and intends to see that loyal executives are treated fairly.

NOW, THEREFORE, to assure the Company that it will have your continued dedication and the availability of your advice and counsel notwithstanding the possibility or occurrence of a change of control of the Company, and to induce you to remain in the employ of the Company, and for other good and valuable consideration, the Company hereby agrees with you as follows in this Change of Control Agreement (this "Agreement");

1. Severance Benefits. In the event that: (i) a Change of Control is consummated, (ii) your employment with the Company is thereafter terminated by the Company for any reason other than for Cause or you terminate your employment with the Company for Good Reason, and (iii) such termination occurs on or before the first (1st) anniversary of the date on which the Change of Control is consumed (a “Qualified Termination”), then the Company will pay you a lump sum in cash equal to twelve (12) months of your current annual base salary at the date of such termination (the “Severance Payment”). The Severance Payment shall be paid to you, net any applicable tax or other legally required withholdings, within three (3) business days after the effective date of your termination of employment.
2. Definitions. Certain words or phrases that are initially capitalized or within quotation marks shall have the meanings provided in this Section 2 and as provided elsewhere herein. For purposes of this Agreement, the following definitions apply:
 - 2.1 “Cause” shall mean (i) your commission of fraud, embezzlement, or other similar dishonesty or unlawful conduct with respect to Company or your employment, (ii) committing, pleading guilty, nolo contendere or no contest (or their equivalent) to, entering into a pretrial intervention or diversion program regarding, or conviction of, a felony or any crime or act involving moral turpitude, fraud, dishonesty, or misrepresentation, (iii) committing any act which could reasonably adversely affect or impact to a material degree the interests of the Company or in some manner materially injure the reputation, business, or business relationships of the Company, (iv) your failure or inability to adequately perform your duties for, or responsibilities to, the Company after notice from the Board or the Chief Executive Officer setting forth in reasonable detail the nature of such failure, which failure shall not have been remedied by you within ten (10) days of receiving such notice, or (v) any material breach by you of your Employee Obligation Agreement, as defined below. Any act, or failure to act, that is within authority given pursuant to a resolution duly adopted by the Board or based on the advice of counsel of the Company shall not provide a basis for termination for Cause hereunder.
 - 2.2 “Change of Control” shall be deemed to take place if hereafter (i) any person, entity, or “group” (as described in Rule 13d-5(b)(1) promulgated under the Securities Exchange Act of 1934, as amended), other than an affiliate or subsidiary of the Company or an employee benefit plan established or maintained by the Company, a subsidiary of the Company, or any of their respective affiliates, acquires more than 50.0% of the combined voting power of the Company’s then outstanding securities; or (ii) the consummation of (A) a merger or consolidation of the Company with or into another corporation unless, after giving effect to such transaction, the stockholders of the Company immediately prior to such transaction own more than 50.0% of the aggregate voting power of the Company or the successor entity of such transaction, or (B) a sale or disposition of all or substantially all of the Company’s assets.

- 2.3 “Good Reason” means (i) the failure of the Company to pay your salary at no less than the rate in effect immediately prior to the Change of Control, (ii) the assignment of you to a position, responsibilities, authority level, or duties of a materially lesser status or degree of responsibility than your position, responsibilities, authority level, or duties immediately prior to your Change of Control, and (iii) (your transfer to a work site more than twenty-five mile distant from your work site immediately prior to the Change of Control, in each case without your consent.
- 2.4 “Person” means an individual, a corporation, an association, a partnership, an estate, a trust or other entity or organization (including a “group” as defined in Section 13(d)(3) or 14(d)(2) of the Securities Exchange Act of 1934, as amended), other than the Company or any of its subsidiaries or affiliates.
3. Assignment. Neither the Company nor you may make any assignment of this Agreement or any interest herein, by operation of law or otherwise, without the prior written consent of the other; provided, however, that the Company may assign its rights and obligations under this Agreement without your consent in the event that the Company shall hereafter effect a reorganization, or consolidate with, or merge into any Person or transfer all or substantially all of its property or assets to any Person, but only to such Person. This Agreement shall inure to the benefit of and be binding upon the Company, its successors (including without limitation any transferee of all or substantially all of its property or assets) and permitted assigns.
- In the event of any merger, consolidation or sale of assets as described above, references to the Company in this Agreement shall, unless the context suggests otherwise, be deemed to mean the entity resulting from such merger or consolidation or the acquirer of such assets of the Company.
4. Notices. Any and all notices, requests, demands, acceptances, appointments and other communications provided for by this Agreement shall be in writing and shall be effective when actually delivered in person, sent by telecopy or similar teletransmission with confirmation of transmission or, if mailed, five (5) days after having been deposited in the United States mail, postage prepaid, registered or certified, and addressed to you at your last known address on the books of the Company or, in the case of the Company, addressed to its principal place of business, attention of Chief Executive Officer, or to such other address as either party may specify by notice to the other actually received.
5. At-Will Employment. By signing this Agreement, you acknowledge and agree that nothing in this Agreement shall be construed as creating any obligation by the Company or any subsidiary or affiliate thereof to employ you for a specified term or to continue your employment. Unless otherwise specifically set forth in another written agreement between you and the Company, your employment with the Company, is solely on an “at-will” basis, and therefore your employment may be terminated by the Company at any time and for any reason.

6. Compliance with Employee Obligation Agreement. By signing this Agreement, you agree and acknowledge that the Employee Obligation Agreement, executed in 2023 or before as applicable, that you previously entered into with the Company (the “Employee Obligation Agreement”) shall at all times remain in full force and effect in accordance with the terms thereof, and nothing set forth in this Agreement shall modify, waive, or alter any provision of such agreement.
7. Acceleration of Option Vesting. Immediately upon a Change in Control and notwithstanding anything in any Option Award Agreement to the contrary, all stock options subject to any Option Award Agreement shall, to the extent not then already vested and excluding any options that have on such date already expired or been terminated, automatically and immediately vest upon the Change of Control and shall thereafter be exercisable in accordance with the terms and provisions of the applicable Option Award Agreement. The term “Option Award Agreement” means any agreement in effect prior to the date of this Agreement whereunder you have been granted options to purchase shares of common stock of the Company, and the provisions set forth in the preceding sentence shall constitute an amendment to each Option Award Agreement held by you.
8. Termination in Connection With a Change in Control. (i) In the event that a Change in Control (as defined below) occurs and Employee terminates his own employment with the Company by delivering written notice of termination to the Company within thirty (30) days after such Change in Control (an “Employee Termination Notice”), then Employee shall be entitled to lump-sum severance compensation in an amount equal to one year of Employee’s then-current base salary (the “Change in Control Compensation”). The Change in Control Compensation shall be payable on the last pay day of the month in which the Change in Control occurs, but no earlier than fifteen (15) days after Employee delivers the Employee Termination Notice to the Company. In addition to the Change in Control Compensation, the Employee shall, to the extent permitted by any applicable benefit plan, continue to receive, from the date of termination through the first anniversary of such date of termination, all employee health and welfare benefits that Employee would have received during such period in the absence of such termination. Employee agrees and acknowledges, however, that Employee will forfeit the right to receive Change in Control Compensation and benefits during such period immediately upon the Employee’s breach of any covenant set forth in Section 6 of this Agreement. In addition, all unvested shares subject to any equity award shall immediately vest upon the effective date of termination of Employee’s employment as set forth in the Employee Termination Notice. In addition, the period of time during which Employee shall be entitled to exercise any equity award that is an option shall be extended to the earlier of (a) the second anniversary of such effective date of termination or (b) the date on which such option would otherwise expire and terminate in accordance with the terms of such option (without giving effect to any expiration or termination that is based upon the date of any termination of employment). In addition,

9. Compliance with 409A. This Agreement is intended to conform in all respects to the requirements under Section 409A of the Internal Revenue Code of 1986, as amended (“Section 409A”). Accordingly, this Agreement shall be interpreted, construed, administered and applied in a manner as shall meet and comply with the requirements of Section 409A, and the Board may amend this Agreement in its discretion and without your consent to the minimum extent necessary so as to comply with any such requirement. Any reference in this Agreement to Section 409A, or any subsection thereof, shall be deemed to mean and include, to the extent then applicable and then in force and effect (but not to the extent overruled, limited or superseded), published rulings, notices and similar announcements issued by the Internal Revenue Service under or interpreting Section 409A and regulations (proposed, temporary or final) issued by the United States Secretary of the Treasury under or interpreting Section 409A.
10. Miscellaneous. The headings and captions in this Agreement are for convenience of reference only and in no way define or describe the scope of content of any provision of this Agreement. This Agreement contains the entire agreement of the parties and supersedes all prior agreements and understandings, written or oral, with respect to the subject matter hereof. This Agreement may not be modified, waived or discharged unless such modification, waiver or discharge is agreed to in a writing signed by you and such officer as may be specifically designated by the Board. The validity, interpretation, construction and performance of this Agreement shall be governed by the domestic substantive laws of the State of California without giving effect to any choice or conflict of laws provision or rule that would cause the application of the domestic substantive laws of any other jurisdiction. This Agreement may be executed in two or more counterparts, each of which shall be an original and all of which together shall constitute one and the same instrument. If any term or other provision of this Agreement is invalid, illegal or incapable of being enforced by any rule of law, or public policy, all other conditions and provisions of this Agreement shall nevertheless remain in full force and effect so long as the economic or legal substance of the transactions contemplated hereby is not affected in any manner adverse to any party. Upon such determination that any term or other provision is invalid, illegal or incapable of being enforced, the parties hereto shall negotiate in good faith to modify this Agreement so as to effect the original intent of the parties as closely as possible in an acceptable manner to the end that the transactions contemplated hereby are fulfilled to the fullest extent possible.

If you are in agreement with the foregoing, please so indicate by signing and returning to the Company the original of this Agreement, whereupon this Agreement shall constitute a binding agreement between you and the Company.

The second copy is for your records.

Very truly yours,

LIQUIDMETAL TECHNOLOGIES , INC.

CERTIFICATIONS

I, Tony Chung, certify that:

1. I have reviewed this annual report on Form 10-K of Liquidmetal Technologies, Inc.;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer(s) and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a) Designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b) Designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c) Evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d) Disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth fiscal quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer(s) and I have disclosed, based on our most recent evaluation of internal control over financial reporting, to the registrant's auditors and the audit committee of the registrant's board of directors (or persons performing the equivalent functions):
 - a) All significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b) Any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

**CERTIFICATION PURSUANT TO 18 U.S.C.
SECTION 1350, AS ADOPTED PURSUANT TO SECTION 906
OF THE SARBANES-OXLEY ACT OF 2002**

In connection with the Annual Report of Liquidmetal Technologies, Inc. (the “company”) on Form 10-K for the year ending December 31, 2025, as filed with the Securities and Exchange Commission on the date hereof (the “Report”), I, Tony Chung, Chief Executive Officer and Principal Financial Officer of the Company, certify, pursuant to and for purposes of 18 U.S.C. Section 1350, as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002, that:

- (1) The Report fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) The information contained in the Report fairly presents, in all material respects, the financial condition and results of operations of the company.
